MEDISANA® *made for Life*

360° Preventive Health Care

For over 30 years, MEDISANA has been specialising in providing help to those who wish to help themselves. We are one of the leading specialists in home health care, health control and home therapy.

In the process, MEDISANA has been focussing on "Innovation from Tradition" and we are working continuously on the innovation, advanced development and optimisation of health care products for the user at home. Several products that today belong to the industry standard were introduced by MEDISANA for the first time.

Active health care is becoming increasingly important for individuals and apart from health control it includes self-treatment and qualified personal care. The most effective counterbalance to stress and other causes of many everyday complaints are a proper amount of exercise and sporting activity.

Therefore MEDISANA completes its range with the new segment "Sport": smart products for the booming fitness market - light and flexible, precise and highly compatible.

The segment "Healthy Home" in the MEDISANA Catalogue is also new. In this segment we present our solutions for the improvement of our most important nutritional element - air. Thus 360° health care becomes a reality. It accompanies us discreetly and reliably at work and at play, at home and on the go, by day and by night.

We support people with our products - and we support them with our service, advice with the know-how of our business partners, in order to always develop better solutions and products and to be more successful together. In this manner, we strengthen the competence of our trade partners towards their customers with the quality of our products and our excellent service.

Excellent quality

We have high confidence in the quality of our products. Therefore we voluntarily go beyond mere statutory requirements by offering a guarantee of at least 3 years. The fulfilment of the criteria of the World Health Organization (WHO), the regular con-

duct of audits and certification of our products under the MDD (Medizinprodukterichtlinie = Medical Devices Directive) naturally is an important aspect of MEDISANA's product development process.

Mobile health management with MEDISANA.

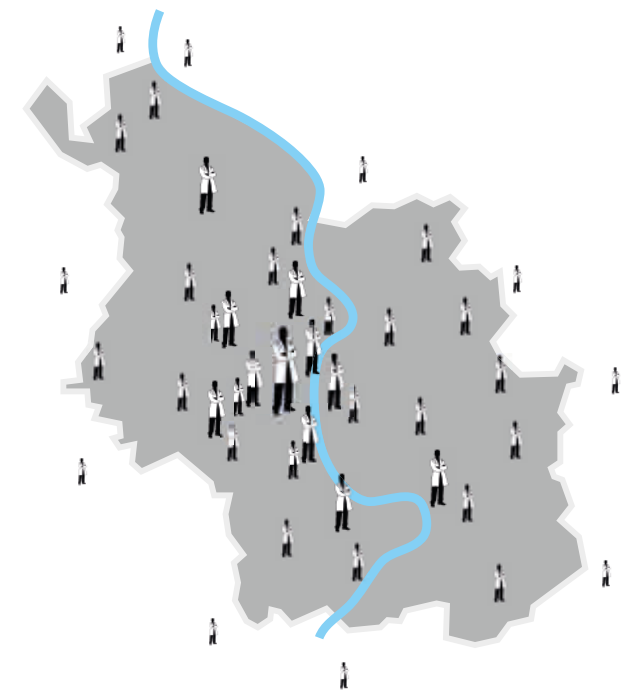

Mobile diagnostic devices help to monitor and control health, even if there is no doctor in the vicinity.

NEW TECHNOLOGIES do not only empower people with an information mobility that allows them to both gather and share information at any time and in any place. Modern medical diagnostic devices provide especially support for those with less mobility to monitor their most important vital signs as well as to analyse and synchronise them and to share them with doctors, fitness trainers, health insurance companies or even friends. Therefore mobile health control has taken on enormous importance for those who find themselves in circumstances where health care infrastructures are limited and they do not live close to medical practitioners and other health care facilities. This and other advantages of mobile self-monitoring of one's health are acknowledged and encouraged by government health care authorities as well as by the operators of medical networks. We seek to provide a higher level of health care while at the same time reducing the cost thereof.

Distribution of general practitioners in the city and surrounding areas as of 2013

Distribution of general practitioners in the city and surrounding areas as of 2023 (projected)

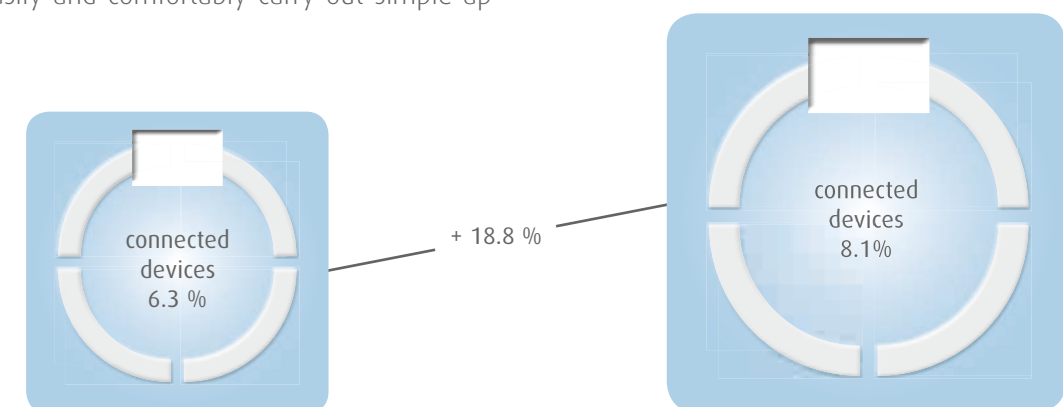

Professional organizations predict that in 2023 there will be **ONE THIRD LESS GENERAL PRACTITIONERS** (Ärztemonitor 2014). This lack of practitioners will have its quickest and most intense effect on less attractive, rural areas. The cause of this development is both the reduced attractiveness of many locations but principally the reduced number of the next generation of doctors.

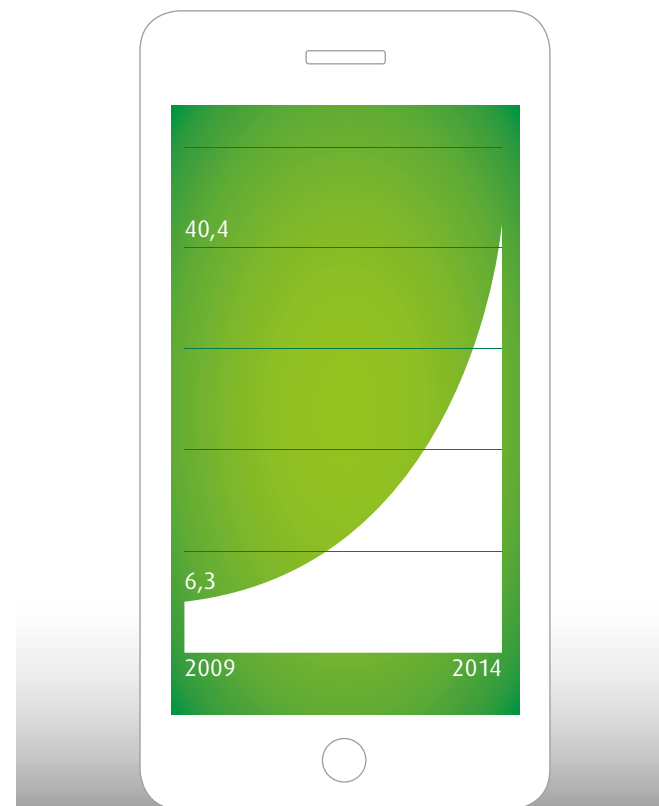

In order to nonetheless guarantee medical care in the face of this apparently unstoppable development, health care officials have called for the manufacturers of mobile diagnostic devices, developers of medical software, and operators of health portals to develop products that can address this threat of a lack of sufficient health care.

For the foreseeable future **POCT DIAGNOSIS** (Point-of-Care Testing and/or laboratory diagnostic techniques that are accessible to patients) will constitute a pillar for the provision of medical care – above all, where general practitioners are not locally accessible. Patients themselves can easily and comfortably carry out simple ap-

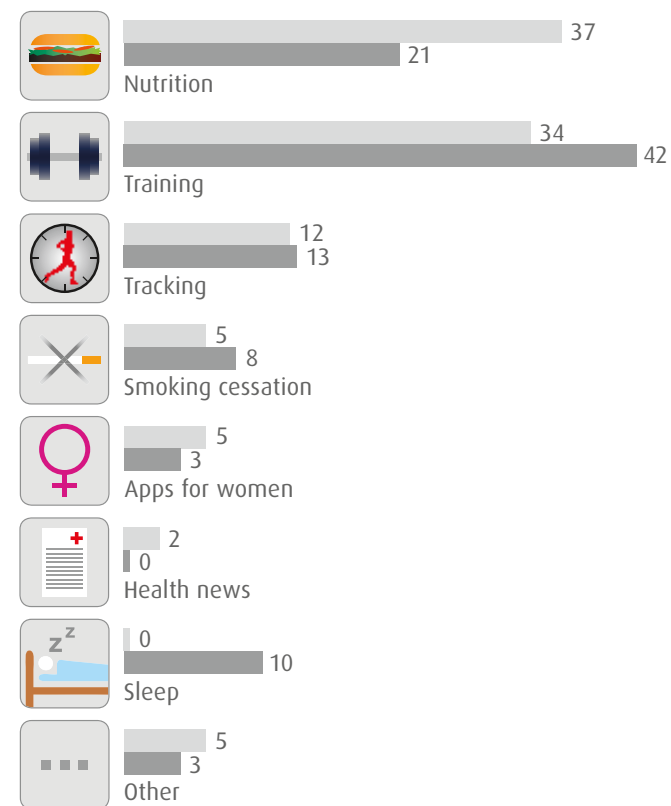

plications such as blood pressure monitoring, weighing themselves or checking blood glucose levels. Of course MEDISANA recommends the additional security of an examination by a doctor, pharmacist or other health care professional in addition to regular self-monitoring.

The development of body analysis devices in the market place (personal scales, digital fever thermometers, blood pressure measurement devices) in Germany from January to December 2013 (GfK Panelmarkt).

Number of smartphone users in Germany in 2009 and in 2014 in millions (Statista 2014).

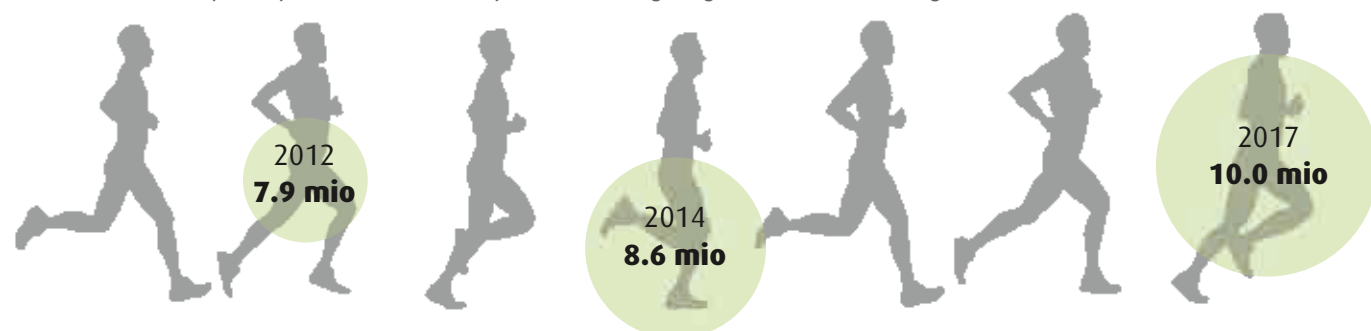

2013 user percentages for German health and fitness apps (by per cent, ■ paid / ■ free).

APPS FOR HEALTH CONTROL will soon be standard applications for smartphones and tablets. Since the introduction of VitaDock® and the first VitaDock® app in 2010 MEDISANA has done pioneering work in this area. MEDISANA develops its products in conjunction with telecommunication companies, hardware manufacturers, software developers, and product designers. The current products already reflect the experiences accumulated through several product generations and many software iterations.

REGULAR EXERCISE has established itself as an important component of personal health care, ever since lack of activity has been identified as a key factor in the emergence of many health problems. Years ago the slogan was „more exercise helps more.“ Today sports medicine is aware that only a training program that is customised through the individual, controlled and targeted training on specific goals is effective. MEDISANA use fitness and training control as an important component of health control. The newest generation of products for this rapidly growing market are smarter and lighter than their predecessors - and therefore the ideal companion for almost all types of sport activity.

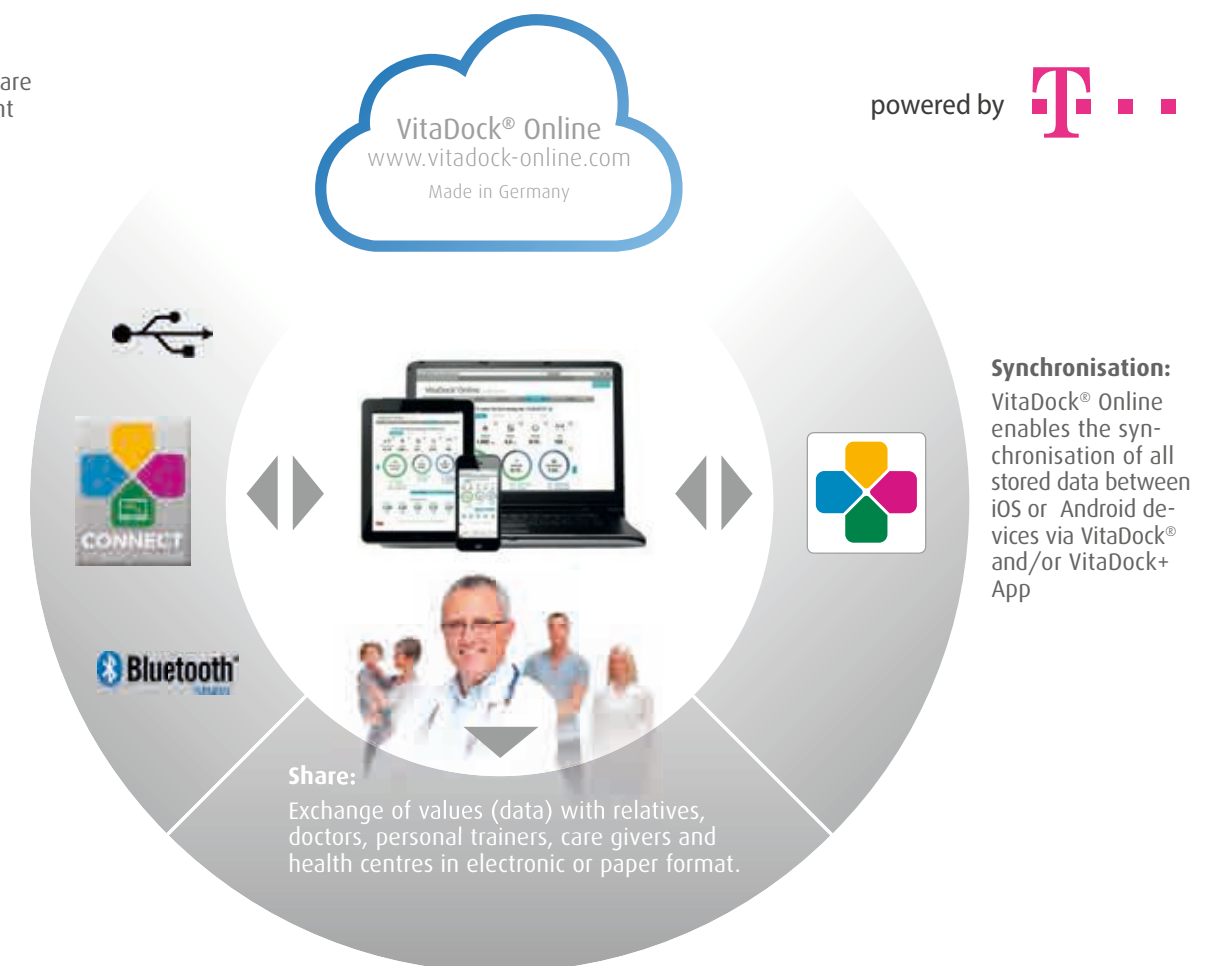

More and more people in Germany engage in regular sport activities (Deloitte-Analyse). The fitness market is growing by leaps and bounds. Leading sports activities are cycling, fitness/gymnastics and running – all of which are types of sport activities that can be carried out in an especially efficient and healthy manner through regular control of vital signs.

Store, sync and share the most important health data and vital signs.

Transfer to VitaDock® Online via USB cable
Transfer to VitaDock® Online via Bluetooth and VitaDock® and/or VitaDock+ App

VITADOCK® ONLINE is the portal for the health monitoring needs of the future today. It offers central storage of all vital data without memory limit and their availability worldwide. In addition, easy forwarding or printing of statistics or tables for one's doctor, personal

trainer or health insurance company and finally backup and synchronisation of data between multiple iOS or Android devices. VitaDock® Online is compatible with MEDISANA Bluetooth Connect and USB devices.

MEDISANA USB and Bluetooth Connect devices:

WITH GENERATION CONNECT MEDISANA offers a product range compatible with VitaDock® online for mobile health monitoring and for use while participating in sport. Each measurement device marked with the Connect icon is 100% connective and adapted to transmit the measured data on the VitaDock® or VitaDock+ app on VitaDock® Online (via

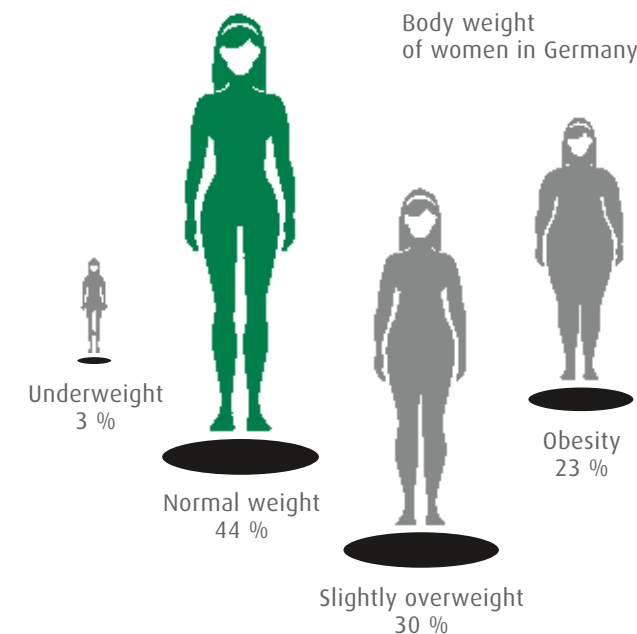

USB cable and/or Bluetooth). The VitaDock® apps for iOS or Android are available as a free download at:

Modern health control with MEDISANA.

It can be so easy to protect oneself from the effects of common diseases.

HEALTH CONTROL via Smartphone and apps give patients more independence from the doctor – especially from doctor's visits and hospital stays, states the EU Commission for Digital Matters (www.welt.de, 04.20.14). Generally they provide the patient with more control, because he has access to his personal health information and is able to make more decisions. Especially in the fight against common diseases such as obesity, diabetes and high blood pressure, apps offer many advantages – for the patients as well as for the health care systems. Almost 100 billion Euros could be saved in the coming years through eHealth applications. Fever, weight, blood pressure and blood sugar can simply be controlled more effectively - since the introduction of the first generation of VitaDock® MEDISANA has been a pioneer of this movement.

OBESITY in Germany is now more widespread than normal weight. More than half of German women are affected. As for men it is actually 75 %. These are alarming figures and the trend is still rising.

The long-term health consequences of obesity are enormous. Each bodily organ is affected by over weight – from the cardiovascular system to the metabolism to the joints. Against this background, it is more important than ever to keep your own body weight under control.

Modern body analysis scales not only count kilos, but help in an intelligent way to achieve the ideal weight in a healthy, sound manner and to maintain it.

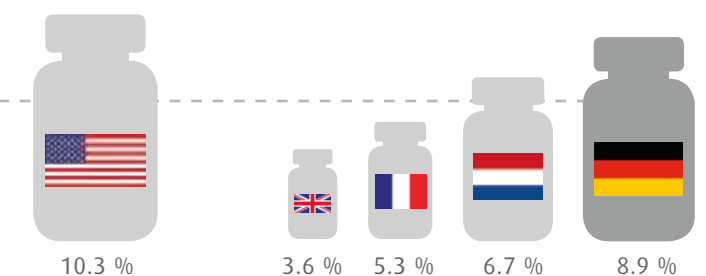

DIABETES MELLITUS is a metabolic disease in which the body does not produce enough insulin or the cells no longer receive the hormone. The blood sugar level rises. Visible symptoms usually appear only when the disease is already advanced. For an early detection, regular blood glucose self-monitoring is recommended.

Independent diabetes management by means of easy and safe-to-use diagnostic equipment helps to detect diabetes mellitus early and to control it. Thus, treatment can be adapted to one's personal lifestyle and prevent permanent health problems.

An international comparison of diabetes prevalence

OECD average 6.5 %

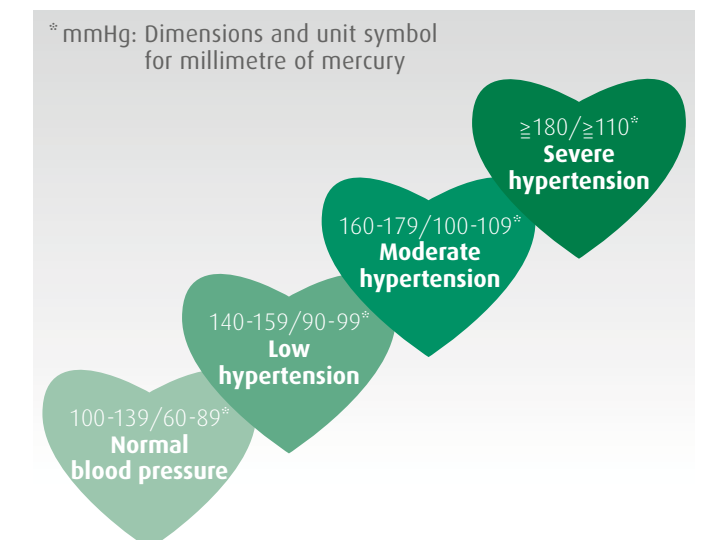

Source: OECD Health at a Glance 2011

HYPERTENSION is one of the main risk factors for vascular disease, kidney or heart failure. Starting with the age of 25 deviations from normal blood pressure start to build up. Beyond the age of 50 years, almost every second person in the population has high blood pressure. Since you may not have developed any complaints or symptoms of high blood pressure for a long time, the disease is often discovered very late. Almost half of all deaths in Germany can be attributed to high blood pressure.

Besides avoiding risk factors such as stress, lack of exercise, obesity, alcohol and tobacco consumption only regular monitoring of blood pressure reduces the risk and prevents long-term consequences.

The various degrees of high blood pressure/hypertension

Upper arm blood pressure monitor BU 550 connect

Faster measurement results thanks to inflation technology – The blood pressure is measured during the inflation of the cuff

Arrhythmia indicator

500 memory slots for each of 2 users

XL display

Bluetooth® Smart (4.0) data transfer to the VitaDock+ app for iOS and Android and to VitaDock Online

Certified medical device

Medisana Connect – Blood pressure control at home and on the go

Wrist blood pressure monitor BW 300 connect

Faster measurement results thanks to inflation technology – The blood pressure is measured during the inflation of the cuff

Arrhythmia indicator

180 memory slots for each of 2 users

Ultra Slim design

Bluetooth® Smart (4.0) data transfer to the VitaDock+ app for iOS and Android and to VitaDock Online

13 mm

Upper arm blood pressure monitor with integrated travel alarm clock BU 575 connect

Faster measurement results thanks to inflation technology – The blood pressure is measured during the inflation of the cuff

Arrhythmia indicator

180 memory slots for each of 2 users

Integrated alarm clock with two settings

Very large digits for easy reading

"Snooze" function

Bluetooth® Smart (4.0) data transfer to the VitaDock+ app for iOS and Android and to VitaDock Online

Certified medical device

MEDISANA connected blood pressure measuring devices offer the same range of functions as professional "stationary measuring" devices. More compact and lighter than ever before, they offer advanced technology. Because of the Bluetooth® interface they are also compatible with VitaDock® Online. Since for reliable blood pressure measurement the time of measurement is of great importance, MEDISANA offers among other products a

professional blood pressure monitor and a compact travel alarm clock in one product. To an extent in an instant the device switches from one function to another and back. Both functions ensure for 100% precision in measuring blood pressure when on the go.

Upper arm blood pressure monitor BU 520 connect

Accurate blood pressure measurement on the upper arm

Measurements are classified according to the WHO (World Health Organisation) evaluation system using a colour indication system

120 memory slots for each of 2 users

Very large digits for easy reading

Display items: systolic, diastolic, pulse, date, time

Bluetooth® Smart (4.0) data transfer to the VitaDock+ app for iOS and Android and to VitaDock Online

Certified medical device

NEW

Upper arm blood pressure monitor with all comfort

Precise measurement is the one function that one can expect from a blood pressure monitoring device certified by the MDD (Medical Device Directive). In addition, the BU 520 Connect offers numerous features that make blood pressure measurement easier, more comfortable and more practical. For example: extra large digits for easy reading of the data, numerous possibilities for evaluation, presentation and saving as well as a Bluetooth interface for data transmission to the VitaDock+ app for iOS and Android and VitaDock® online.

Wrist blood pressure monitor BW 333

Accurate blood pressure measurement on the wrist

Measurements are classified according to the WHO (World Health Organisation) evaluation system using a colour indication system

120 memory slots for each of 2 users

XL cuff (Ø 13.5 - 23 cm)

Slimline design

Certified medical device

NEW

Wrist blood pressure monitor: high precision, slim design

Measurement on the wrist is in many situations the quickest and easiest way to measure blood pressure.

The BW 333 with ultra slim design and flexible cuff now makes this method of measuring easier. It is therefore ideally suited for diagnostically conclusive long-term measurements, enabling the patient to pursue his usual daily activities undisturbed.

Despite the compact design the medical device certified in accordance with MDD offers many practical features such as fully automatic measurement, mea-

surement storage and average value calculation for 2 users. The clear display with its large digits is easy to read in any situation.

Measurements are classified according to the WHO evaluation system using a colour indication system.

NEW

Pulse Oximeter PM 100

Pulse oximeter for determination of oxygen saturation (SpO₂%) and heart rate/pulse

Dual-color OLED display

Oxygen saturation and pulse can be displayed in bar graph or waveform

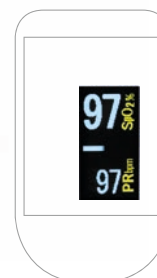

10 adjustable brightness levels

6 different view displays

Simple "one touch" operation – also ideal for travelling

Automatic switch-off after 8 seconds without a measured signal

Certified medical device

The 360° function of the display ensures that the readings are easy to read in any position.

NEW

Pulsoximeter PM 150 connect

Pulse oximeter for determination of oxygen saturation (SpO₂%) and heart rate pulse

View measurements on a LED display

Simple "one touch" operation – also ideal for travelling

Bluetooth® Smart (4.0) data transfer to the VitaDock+ app for iOS and Android and to VitaDock Online

Certified medical device

MEDISANA pulse oximeters provide reliable information even in critical situations

With our pulse oximeters PM 100 and PM 150 connect one measures one's arterial oxygen saturation and heart rate (pulse) for reliable self-monitoring at home or on the road.

The application of pulse oximetry ranges from sports in low-oxygen altitude to health care control and the care of patients suffering from heart or lung diseases. If the body periphery is not provided with enough oxygen, it threatens to overload the cardiovascular system.

With its Bluetooth® Smart interface, the data can be transferred from the PM 150 to all compatible devices, stored and shared from there with e.g. the doctor, friends and family.

Body analysis scale BS 430 connect

- Measurement of weight, body fat, body water and muscle mass
- High-quality stainless steel electrodes
- Convenient "step-on" switch
- Determination of the BMI value
- Integrated calorie requirement analysis (BMR)
- Automatic switch-off after 8 seconds without a measured signal
- Large easy-to-read LCD display with backlight
- Toggles between kg, lb and st
- Four high-precision strain gauge sensors for accurate readings
- Automatic detection of up to 8 users on the scale
- Bluetooth® Smart (4.0) data transfer to the VitaDock+ app for iOS and Android and to VitaDock Online

Bluetooth®
SMART

The body analysis scales of MEDISANA provides more insight than just weight

Body analysis scale BS 440 connect

- Measurement of weight, body fat, body water and muscle mass
- Ultra thin high quality ITO electrodes
- Convenient "step-on" switch
- Determination of the BMI value
- Integrated calorie requirement analysis (BMR)
- Automatic switch-off after 8 seconds without a measured signal
- Large easy-to-read LCD display with backlight
- Toggles between kg, lb and st
- Four high-precision strain gauge sensors for accurate readings
- Automatic detection of up to 8 users on the scale
- Bluetooth® Smart (4.0) data transfer to the VitaDock+ app for iOS and Android and to VitaDock Online

Bluetooth®
SMART

The body analysis scales of MEDISANA measure more of what one should know about one's own body. Four highly sensitive electrodes register apart from weight also body fat, amount of body water, proportion of bone and muscle mass. Additional features for the healthy route to goal weight and monitoring more effective fitness programs are the calorie requirements analysis and calculation of BMI. And that for up to eight users, with automatic user recognition (by weight). All data are easy to read because of large LED display with white luminous digits and bright blue backlight. They can be transferred via Bluetooth® Smart to compatible devices and stored with the VitaDock+ app, graphically displayed and shared with doctors, coaches or friends.

Body analysis scale ISA

Measurement of weight, body fat, body water and muscle mass

Determination of the BMI value

Integrated calorie requirement analysis

Large easy-to-read LCD display with backlight

Body analysis scale ISA – high marks for design and function

Functionality and ergonomics of the body analyser scale ISA are convincing – even to Stiftung Warentest, because the ISA does not only weigh kilos. They determine the BMI value and calculate the proportions of body fat, body water, muscle or bone mass. But it can do even more. This scale helps to prevent weight gain with its integrated calorie needs analysis. The inviting design with weighing surface made of safety glass, blue LED edge lighting, stainless steel electrodes and a backlit LCD display makes the ISA the perfect accessory for fitness programs and diets.

Infrared multifunction thermometer TM 750

Precise measurement of the body temperature in the ear and on the forehead in seconds

Additional function: measurement of ambient temperature, liquids and surfaces

Visual fever alarm with colour change

Automatic storage of the last 30 measurement results

Certified medical device

Audible and visual fever alarm

Green LED:
Temperature ok
Red LED:
Elevated temperature

Simply safe – infrared temperature measurement

The infrared multi-function thermometer is a medical device certified in accordance with MDD (Medical Device Directive) and ensures accurate measurements of body temperature on the forehead or in the ear. In addition, the audible and visual alarm signals fever if the measured temperature is within the normal range or is increased. Ambient temperature, liquids and surfaces can also be measured reliably from 0-100° C. All in a matter of seconds. Measuring readiness and measuring end are signalled acoustically respectively. The readings of the last 30 measurements are stored automatically, including display of date and time.

WRIST BLOOD
PRESSURE MONITOR

Available
Q4 2014

- Display items: systolic, diastolic, pulse, date, time
- Measurements are classified according to the WHO* evaluation system using a traffic-light colour scale
- Arrhythmia indicator
- 60 memory slots for each of 2 users
- Calculates average value of data of the last 3 results
- Certified medical device**

Package content

- Wrist blood pressure monitor
- Batteries
- Storage case

- Size: approx. 7,2 x 7,5 x 3 cm
- Weight: 150 g
- Measuring method: Oscillometric
- Measuring range:
 - Blood pressure: 30-250 mmHg
 - Pulse: 40-180 beats/min.
- Batteries: 2 x 1,5 V (AAA)
- Wrist cuff for 13,5-21,5cm wrist circumferences

Art.-No.: 51070
EAN: 40 15588 51070 0

WRIST BLOOD PRESSURE
MONITOR

- Faster measurement results thanks to inflation technology - The blood pressure is measured during the inflation of the cuff
- Display items: systolic, diastolic, pulse, date, time
- Arrhythmia indicator
- Measurements are classified according to the WHO* evaluation system using a traffic-light colour scale
- 180 memory slots for each of 2 users
- Calculates average value of data of the last 3 results
- Measurement for guests without storage of reading possible
- Very large digits for easy reading
- Bluetooth® Smart (4.0) data transfer to the VitaDock+ app for iOS and Android*** and to VitaDock Online
- Certified medical device**

Package content

- Wrist blood pressure monitor
- Instruction manual
- USB charging cable
- Storage pouch

- Size: approx. 6,5 x 8 x 1,7 cm
- Weight: approx. 150 g
- Measuring method: Oscillometric
- Measuring range:
 - Blood pressure: 0-300mmHg
 - Pulse: 40-199 beats/min.
- Battery: Lithium-Ionen-Akku
- Wrist cuff for 13,5-21,5cm wrist circumferences

Art.-No.: 51294
EAN: 40 15588 51294 0

PULSE OXIMETER

Available
Q4 2014

- Pulse oximeter to measure the saturation of oxygen in blood (SpO₂ %) and the heart rate (pulse)
- View measurements on a LED display
- Simple „one touch“ operation - also ideal for travelling
- Automatic switch-off after 12 seconds
- Bluetooth® Smart (4.0) data transfer to the VitaDock+ app for iOS and Android*** and to VitaDock Online
- Certified medical device**

Package content

- Pulse oximeter
- Battery
- Instruction manual

- Size: approx. 7,6 x 5,6 x 3,1 cm
- Weight: approx. 55 g
- Measuring range:
 - SpO₂: 70% ~ 99%
 - Pulse: 30 - 235 beats/min.
- Batteries: 1 x 1,5 V (AAA)

Art.-No.: 79457

PULSE OXIMETER

Available
Q4 2014

- Pulse oximeter to measure the saturation of oxygen in blood (SpO₂ %) and the heart rate (pulse)
- Oxygen saturation (SpO₂) and pulse rate can be displayed as bars or waves
- View measurements on a OLED display
- Viewable from 6 different angles
- Display brightness adjustable over 10 levels
- Simple „one touch“ operation – also ideal for travelling
- Automatic switch-off after 8 seconds
- Battery level indicator
- Carrying strap included
- Certified medical device*

Package content

- Pulse oximeter
- Batteries
- Instruction manual
- Carrying strap

- Size: approx. 5,8 x 3,4 x 3,5 cm
- Weight: approx. 53 g
- Measuring range:
 - SpO₂: 70% ~ 100%
 - Pulse: 30 – 235 beats/min.
- Batteries: 2 x 1,5 V (AAA)

EAN: 40 15588 79455 1

TM 750
INFRARED MULTIFUNCTIONAL THERMOMETER

- Precise measurement of the body temperature in the ear and on the forehead in seconds
- Additional function: measurement of ambient temperature, liquids and surfaces (0 – 100° C)
- Visual fever alarm with colour change – green: temperature normal, red: raised temperature
- Acoustic signal at the beginning and end of temperature reading
- Automatic storage of the last 30 measurement results
- Display of date and time
- Certified medical device*

Package content

- Infrared multifunctional Thermometer
- Batteries
- Storage pouch

- Size: approx. 13,4 x 4,2 x 4,7 cm
- Weight: approx. 65 g (incl. Batteries)
- Measuring range object: 0 – 100 °C
- Measuring range body temperature: 34 – 43°C
- Scaling: 0,1 °C
- Measurement precision:
 - Forehead: +/- 0.3°C from 34 - 43 °C
 - Ear: +/- 0.2°C from 35.5 - 42 °C
 - Object: ≤30 +/-1.5 °C
 - >30 +/-5%
- Batteries: 2 x 1,5 V (AAA)

Monitor your sports activities with MEDISANA.

Fitness training becomes more efficient, performance better and sport healthier.

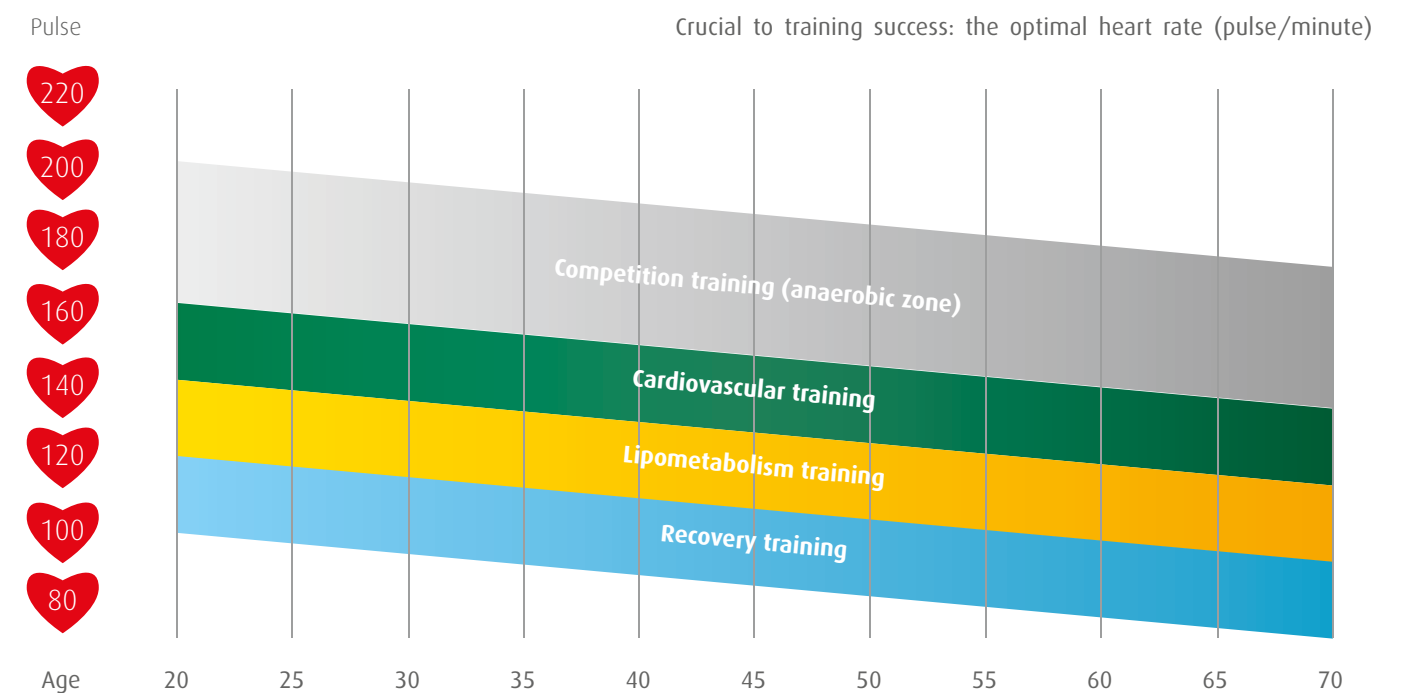

EXERCISE AS PREVENTION against a variety of health problems – to many people this forms a part of active health monitoring. To counterbalance negative health factors such as poor seating ergonomics, stress and poor diet especially endurance sports are recommended and practiced. Only those who train correctly also train in a healthy fashion. This is individual and different depending on the training goal. MEDISANA's discreet and reliable training devices permanently measure and analyse both the stress (pulse) and the performance power and sends signals to the athlete if he is training in his individually defined area.

The most popular sports in Germany. An ideal market for fitness analysis products (Source: Statista 2014)

THE GROWING FITNESS MARKET is an expression of a new body and health awareness. Not only do we participate more in fitness activities, but we are more focussed. People do not simply cycle, run and swim but train according to a fitness plan. Not only the sporting goods and sports apparel market is growing, but also the need for modern fitness products.

They measure heart rate and activities continuously and reliably. The data are displayed in real time and can be saved through interfaces to other smart devices, analysed and shared. The fitness apps and devices should be light, discreet and safe to wear and be compatible with the lifestyle of the user.

CORRECT EXERCISE primarily means to always remain in the personal ideal heart rate range. At the same time these zones differ with one and the same person depending on training goals – and change considerably with increasing age. Thus it is essential for successful training to be based on reliable and above all constantly updated readings to prevent too much or too little training.

Too large measurement intervals or measurement inaccuracies, for example, jeopardize the success of training and perhaps even the health of the athlete through incorrect mounting of the measuring instrument. Another health and safety feature of the pulse measurement by MEDISANA is the high connectivity with modern fitness equipment such as running and rowing ergometers as well as with the most current fitness apps.

Mio® ALPHA 2

Continuous heart rate measuring

Comfortable without chest strap or finger sensor

Capable of transfer to compatible fitness apps (pulse) and back (rate, distance) for clock (iPhone® from 4S, as well as 5th Generation iPod touch and Android from 4.3)

User-customizable heart rate zones with visual and audible alarm

Customizable Display (via Mio® GO App)

24-hour memory for time-delayed synchronization

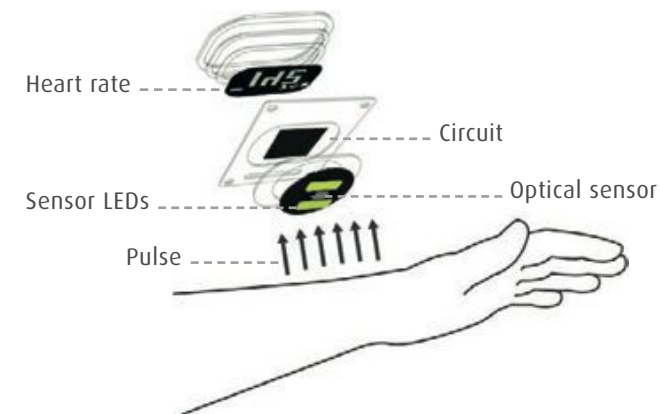

2 timer plus clock (12h or 24h)

Illuminated DOT Matrix Display

12-14 hours for active measurement (standby of up to 9 months)

USB charging dock with magnetic alignment

Water resistant up to 30 meters

An ECG accuracy of 97% is the result of the interaction of an electro-optical lense, 2 LEDs in the green light spectrum (infra green) and complex calculation algorithms - an innovation from Philips.

Automatic connection and data exchange via Bluetooth Smart (4.0) to compatible smartphones (as from iPhone 4S).

NEW: The Mio® ALPHA 2 heart rate monitor watch is available with either a black or yellow frame and in two wrist sizes

Sets new standards in heart rate measurement: Mio® ALPHA 2

The Mio® ALPHA 2 measures the heart rate continuously, without interfering with the athlete's exercise. The watch does not require a chest strap or a finger sensor. Instead it measures heart rate values directly and precisely from the wrist using innovative Philips Sensor LED technology. All measured values are displayed in real time on a large, perfectly readable dot matrix display with backlight. In addition, optical and acoustic signals aid the athlete to always train precisely in his personal heart rate target zone. This increases motivation and performance. "Convincing even without a strap." Stiftung Warentest came to this conclusion during a recent test (6/20/13).

The heart rate readings are transmitted via Bluetooth to all smartphones with Bluetooth® 4.0 support (from iPhone 4S and iPhone 5 as well as from Android 4.3). With this compatibility, the Mio® ALPHA 2 can communicate with popular heart rate monitor fitness apps such as Runkeeper or Runtastic! Whether running or cycling – training is now more convenient, more efficient and healthier.

Mio® FUSE is available in two strap lengths.

Red: large strap
Turquoise: small to medium strap

Heart rate measurement with Mio® FUSE – Performance meets design

Mio® FUSE

Connect to your favorite fitness apps & sport devices with Bluetooth Smart (4.0) and ANT+

Built-in accelerometer to capture: steps, calories, distance, and pace

Chronograph timer with “Touch” to start/stop

Set Goals for your steps, distance, and more (via Mio® GO App)

2 modes: all day mode & workout mode (heart rate activated)

30 hour memory - activity data is stored and can be synced later to smart phones

Multi-Color LED indicates your customizable heart rate zones (via Mio® GO App)

Customizable Display (via Mio® GO App)

Vibration and LED color alarm

12h or 24h mode

Rechargeable lithium-ion battery (via USB charging dock)

Water resistant up to 30 meters

The Mio® FUSE offers the most modern heart rate measurement functions and is slightly larger and heavier than a bracelet. It measures subtle and precise performance and stress, whereby the training effect and health is protected. The light and flexible Mio® FUSE detects directly and continuously, without an uncomfortable chest strap, heart rate data as accurate as an ECG during your workout. Depending on the programming it also counts steps, calories burned, distance and speed.

With its features, the many possibilities for individual settings and compatibility with popular fitness apps and sports equipment (with appropriate interface) Mio® FUSE is fully compatible with competitive sports activities.

Mio® LINK: Heart rate monitoring is so easy

With built in ANT+ or Bluetooth® Smart 4.0 Mio® LINK can also be connected to other sports equipment or apps.

The Mio® LINK pulse bracelet is the easy way to monitor your heart rate. It continuously provides its wearer with high-precision measurement results – without disturbance from the chest strap or cable. Mio® LINK is via Bluetooth Smart and ANT+ compatible with most

popular fitness apps, ergometers and GPS watches. The many options for individual configuration (e.g. five selectable heart rate zones) as well as two different wrist sizes ensure the wearer reliable measurements at any speed.

Change the treadmill into a street: Mio® GO App

The Mio® GO mobile app creates a stimulating virtual environment for indoor and outdoor training. In connection with Mio® ALPHA, LINK or FUSE the Mio® GO App turns indoor training into a fantastic experience. Based on the measured heart rate the Mio® GO app adjusts the visual representation (e.g. on a Tablet PC) in real time to the intensity of the exercise. Thus athletes move with their actual speed through real landscapes. Using a location-tracking option, the MIO® GO app allows users to record their own routes.

The app includes features such as continuous heart rate monitoring, customizable heart rate ranges, as well as comprehensive statistics.

Mio® LINK

Continuous heart rate measuring

No uncomfortable chest strap, so you can train in comfort

Two LED sensors and an electro-optical cell "sense" the volume of blood in the capillary (patented Philips Technology).

Customize your workout with up to 5 user-customizable heart rate zones

Silicone soft strap

USB charging dock with magnetic alignment

Rechargeable lithium-ion battery

Connect to your favorite fitness apps & sport devices with Bluetooth Smart (4.0) and ANT+

New training experience possible in combination with Mio® GO app

Bluetooth® SMART

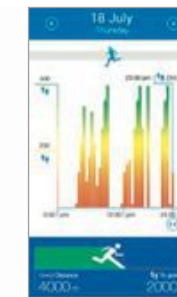

ViFit Pro – the ideal companion for

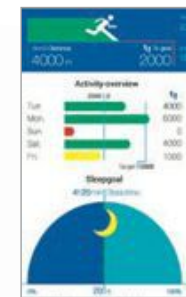

With ViFit Pro connect one has a choice of three application modes. Activity mode: tracks steps, distance and burned calories. Especially useful for light daily training or fitness programs is the measuring of activity duration and the status indicator for the activity goal in % previously defined by the user. In sleep mode, the original 3D motion sensor of **BOSCH** also measures nocturnal activity precisely and thus the quality of sleep. By displaying the sleep profile, the user is provided with important information on whether and how nocturnal recovery can be optimised. The new "pause" function of ViFit Pro connect is also convenient. With this function certain distances, e.g. those undertaken by car, are not counted.

The VitaDock+ App provides a comparative overview of the steps taken, calories burned and sleep duration.

The daily overview shows the intensity of activities undertaken during the day in terms of time elapsed. Colour is used to designate intense, moderate or reduced levels of movement.

The sleep overview provides a graphic presentation of the duration of sleep and movement activity during sleep.

those who like to set and reach goals

This activity tracker is designed for continuous use – robust and water resistant, comfortable and discreet. The custom-fit strap provides a secure fit and thus a reliable generation of the data.

All measured data can be transferred to VitaDock® Online, so that they can easily be reviewed with the PC, Mac, iPhone®, iPod touch®, iPad® and various Android devices, are monitored in clear diagrams or shared from there. To do this determine the settings in the VitaDock+ app before first use and synchronise them via Bluetooth Smart (4.0) with the ViFit Pro connect.

ViFit Connect

Activity mode: Tracks steps, distance, burned calories, activity time in hours and daily target in %

Sleep mode: Tracks activity during sleep and hours slept

Highly sensitive sensor: only reacts to real movement

Modern and attractive design: can be worn discreetly

Stores the results of the last 15 days, battery indicator

Bluetooth® Smart (4.0) data transfer to the VitaDock+ app for iOS and Android and to VitaDock Online

ViFit – counts every step, because every step counts

The ViFit Activity Tracker proves that not only what appears like fitness keeps us fit. ViFit counts and displays exactly each COMPLETED step, calculates every calorie burned. Using an original 3D motion sensor of **BOSCH** ViFit captures all physical activities of the day - and night, because ViFit also measures the duration and quality of sleep. It can be easily and discreetly carried on the body and is not only the perfect tracker, but also motivates its user to take the steps instead of the lift.

ViFit

Activity mode: Tracks steps, distance, burned calories, activity time in hours and daily target in %

Sleep mode: Tracks activity during sleep and hours slept

Highly sensitive sensor: only reacts to real movement

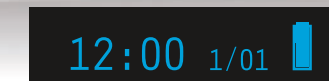

Modern and attractive design: can be worn discreetly

Stores the results of the last 15 days, battery indicator

USB interface and USB cable

Number of steps taken

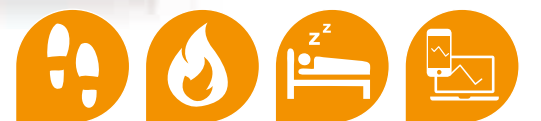

Time, date, battery

Calories burned

Activity duration in hours

The ViFit with original 3D motion sensor of **BOSCH** offers many custom settings. Its greatest advantage is 100% connectivity. The ViFit Activity Tracker is available with Bluetooth® Smart or a USB port. In this way measured data can be transferred to VitaDock® Online, so that they can easily be evaluated with the PC, Mac®, iPhone®, iPod touch®, iPad® and various Android devices and are monitored in clear diagrams.*

ViFit and ViFit Connect – fitness can be so easy.

* PC or Mac® with Internet connection. From USB 2.0, Windows XP (SP 3, 32-Bit), Windows Vista (SP 1), Windows 7, Windows 8 Pro, Mac OSX 10.7.

Wellness with MEDISANA.

Thus stress,
tension and pain
are treated today
– at home, at
work and on the
move.

STRESS, LACK OF EXERCISE AND WRONG BODY POSTURE are the most common causes of back pain. Almost every adult regardless of sex and age deals with back pain. Regardless of whether you do physical or mental work – the back deteriorates over time. In addition there is the usual acute tension caused by cold weather or exposure to sports. Back, neck and shoulders tense up slightly. No treatment or incorrect treatment can lead to persistent muscular tension and chronic pain. The timely targeted use of heat, movement and light massages quickly remedies the situation.

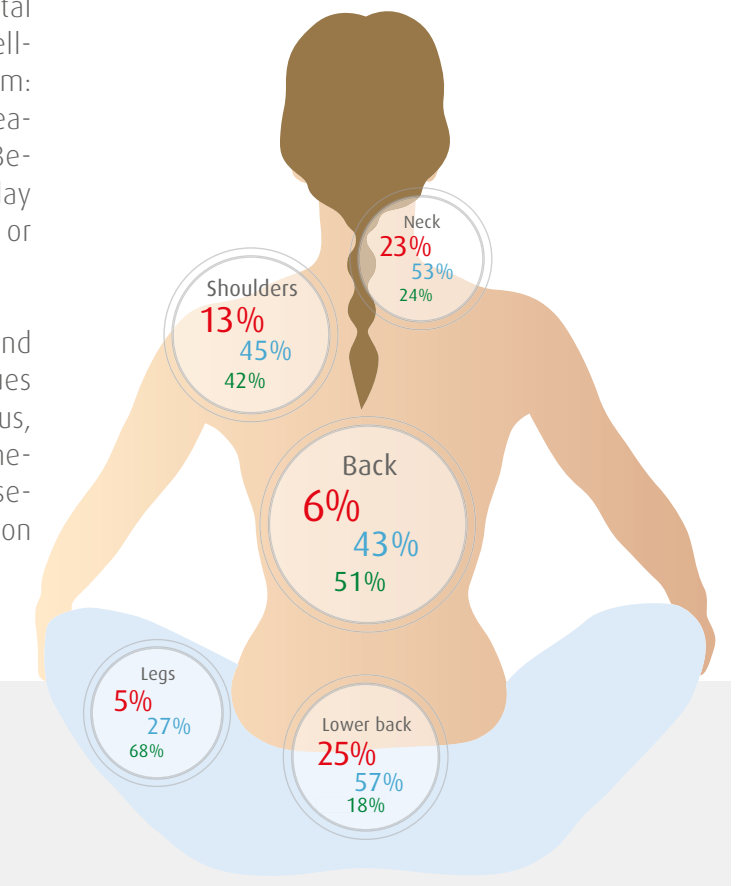

MASSAGE is pure relaxation. Muscular and mental tension dissolve, pain decrease and a feeling of well-being can spread throughout the body. The problem: even making an appointment for a massage is already an additional stress factor for the most people. Because integrating a soothing massage into everyday life is often not possible treatments are postponed or cancelled.

The latest generation of massage seat pads and cushions of MEDISANA simulates the grip techniques of classic massage, shiatsu and Thai massage. Thus, the relaxing effect can be enjoyed anytime, anywhere. Self-massage from head to toe – from the loosening of individual muscle groups and the stimulation of blood flow to acupuncture, anything is possible.

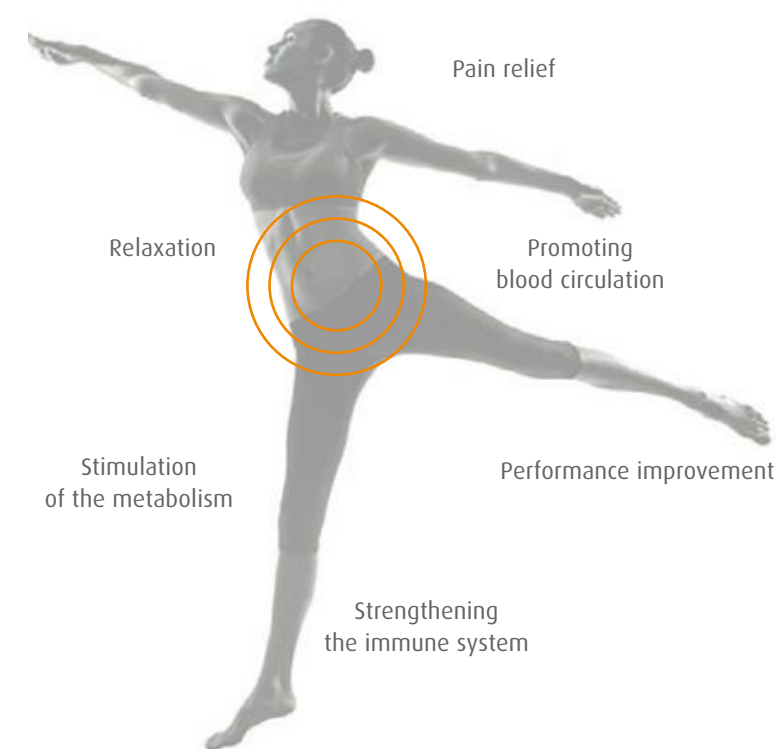

A representative survey of the nature and frequency of back pain and muscular tension.

■ very often ■ now and again ■ seldom or never

(Rückenreport Schweiz 2011)

FLEXIBLE HEAT relaxes and vitalises. New research indicates that heat dissolves small points of tension and spasms such as aching muscles, alleviate pain and affect wound healing positively. Heat is also used successfully for chronic pain. Body and mind respond equally positively to heat. Properly used, heat raises the general well-being, strengthens the immune system and promotes self-healing processes in the body.

WITH THE OEKO-TEX® LABEL "Confidence in Textiles" the beneficial effects of MEDISANA heating pads and blankets can be enjoyed every day. All products and/or the textiles incorporated therein awarded the Oeko-Tex® label are free of pollutants in accordance with independent testing by Oeko-Tex® Standard 100 for harmful substances. They are thus harmless to your health when used on a daily basis – extra security for demanding and critical consumers

CONFIDENCE IN TEXTILES

Tested for harmful substances according to Oeko-Tex® Standard 100

Stepless adjustable neck massage

Shiatsu acupressure massage seat cover MC 825

Novel acupressure massage in the waist and thigh area

Targeted air massage stimulates specific acupressure points

Intensive shiatsu massage in the back area

3 selectable massage zones for shiatsu massage: total, upper or lower back

Additional red light and heat function

Separate, height-adjustable neck massage

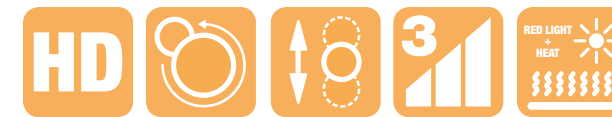

Shiatsu acupressure 2in1 massage

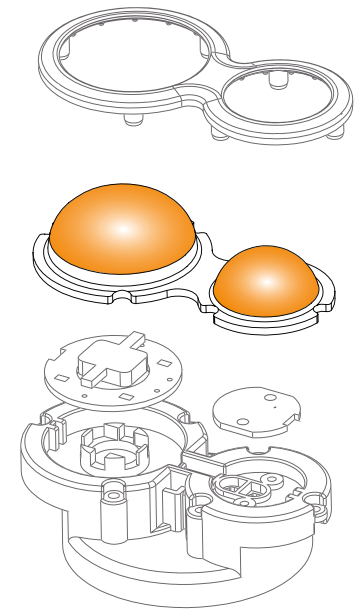

The Shiatsu acupressure massage cushion combines an intensive shiatsu massage with targeted air pressure massage to stimulate specific acupressure points. In addition to the massage for neck, back and buttocks the shiatsu acupressure massage cushion offers a massage function for the sensitive side area of the lumbar spine. The heating function in the backrest also supports the relaxation and relieves muscle tension and pain in the back area. Different functions and intensity levels can be selected via the remote control at your convenience.

Handy remote control

Gel massage heads, made in Germany

Shiatsu massage seat cover with gel cushions MC 830

Intensive shiatsu massage in the back area

Massage heads made of high-quality Technogel® for a softer and healthier massage – made in Germany

Spares spine and hip bones

3 selectable massage zones: total, upper or lower back

3 selectable massage intensities

Separate vibration massage in the seat

Additional red light and heat function

NEW

HD

Softer intensity with Technogel®

The benefits of the shiatsu massage cushion with gel heads instead of conventional plastic massage heads are in their gentle effect. Like the original Shiatsu massage, gel massage massages the muscles exclusively, while bone, cartilage, etc., which fall within the range of the massage cannot be strained. The massage effect is exactly as intense as with conventional massage heads.

Handy remote control

NEW

Shiatsu massage seat cover MC 822

3 types of massage in the back area:
Shiatsu, rolling and spot massage

3 selectable massage zones: total,
upper or lower back

Separate vibration massage in the seat
with 3 selectable intensity levels

Separate, height-adjustable neck
massage

Additional red light and heat function

Automatic power off after 15 minutes

Handy remote control

Detachable, washable neck cover

Convenient velcro for fastening at the
back of the chair

HD 3D

Unlimited massage possibilities

The shiatsu massage cushion MC 822 not only offers three types of massage, but also boasts a wealth of features for a perfect massage experience. In addition to three massage zones in the back area an extra treatment of the neck, vibration in the seat area and a relaxing heat function can also be activated. The massage seat cover is easy to position on many seats. It has an easy-to-clean seat cover that is removable in the neck area and can be washed.

Handy remote control

Shiatsu Neck massager NM 860

Intensive shiatsu massage in the neck area;
also applicable on shoulder, back, abdo-
men, upper and lower leg

4 rotating massage heads

2 levels of rotation speed selectable

Additional light and heat function

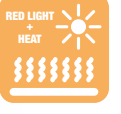

Massage intensity individually adjustable
through pulling the holding straps

Removable, washable cover above
the massage heads

More intense relaxation – with four moving heads

The neck muscles are among the most sensitive and at the same time the most stressed of the muscle groups. Acute neck tension, whether triggered by weather, overburdening or improper posture, e.g. in a non-ergonomic workplace, can lead to limitations in mobility and chronic pain if left untreated. The MEDISANA

neck massager ensures rapid relaxation through a combination of four rotating massage heads and additional heat. The user himself determines the degree of massage by pulling on the straps.

HD

Heating blanket HDW

- 4 temperature settings
- Fast heat with powerful 120 watts
- Safety system with overheating protection
- Automatic switch-off after 180 minutes
- Reversible blanket with 2-colour design
- XL size: 180 × 130 cm

NEW

Cosy upper material

More energy for the day, better sleep at night

Heat is energy. If the body is unable to produce enough heat, the body's functions are reduced. Physical and mental performance is reduced and pathogens can take advantage of this weakness. Those who quickly get cold, can find comfort in the electric blanket HDW and the heated

mattress both during the day and at night, rejuvenating and strengthening the immune system. Only pollutant-free materials, marked with the Oeko-Tex® label "Confidence in Textiles", completes the feeling of well-being.

Heated underblanket HU 665

- 3 temperature settings
- Safety system with overheating protection
- Washable thanks to detachable controller
- Pleasantly soft upper material

NEW

Foot warmer FWS

- 3 temperature settings
- Fast heat with powerful 100 watts
- Automatic switch-off after 90 minutes
- Safety system with overheating protection
- Removable fluffy soft lining
- Large foot space, suitable up to shoe size 46

If one's feet are warm, the whole body relaxes

The foot warmer FWS is not only something for the cold season, but contributes to your well-being all year round. There are more reasons for cold feet and freezing than mere cold. Causes could also be fatigue, underweight or circulatory disorders. With its combination of three-stage heat and cosy lining, the MEDISANA foot warmer alleviates physical discomfort from head to toe. The reflex zones as well as blood circulation are stimulated, blood circulation, body and spirit relax and one is able to recharge one's batteries.

- Hand massager

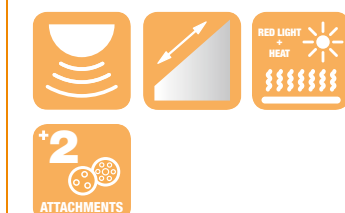

- Size: approx. 28 x 6 x 7 cm
- Weight: approx. 0,3 kg
- Power output: 15 watts
- Power supply: 230 V/50 Hz

Art.-No.: 88297
EAN: 40 15588 88297 5

ITM
HAND MASSAGER

- Vigorous tapping massage
- Continuous adjustment of massage intensity
- Additional red light and heat function
- Various massage attachments: acupressure and spot massage
- Easy to use thanks to its ergonomic shape
- Non-slip grip
- Extra-long cable

Package content

- Hand massager
- 4 massage attachments

- Size: approx. 44 x 14 x 13 cm
- Weight: approx. 1,7 kg
- Power output: 35 watts
- Power supply: 230 V/50 Hz

Art.-No.: 88275
EAN: 40 15588 88275 3

HM 850
HAND MASSAGER

- Soothing and vigorous tapping massage
- 2 selectable massage intensities
- 4 ergonomically arranged massage heads
- Ideal also for use at home or on the go
- Light and handy design for convenient self-massage

Package content

- Hand massager
- Batteries

- Size: approx. 28 x 9 x 10 cm
- Weight: approx. 0,4 kg
- Batteries: 2 x 1,5 V (Type C)

Art.-No.: 88295
EAN: 40 15588 88295 1

HM 840
MINI-HAND MASSAGER

- Comfortable vibration massage
- With removable and washable massage pad made of natural loofah
- Intensive peeling effect when using with loofah pad
- Waterproof for use in the shower or when bathing
- Light and handy design for convenient self-massage

Package content

- Mini-Hand massager
- Loofah pad
- Batteries

- Size: approx. 8 x 8 x 7 cm
- Weight: approx. 0,2 kg
- Batteries: 3 x 1,5 V (AAA)

Art.-No.: 88520
EAN: 40 15588 88520 4

FS 885 COMFORT
FOOT SPA

- 3 in 1: Bubble bath and vibrating massage and red light
- Water can be heated to the preferred temperature (20° to 48°C)
- Timer function for 20/30/40/50/60 minutes
- Digital display for timer setting and water temperature
- Automatic red light and heat function
- Massage rollers in the middle of the foot bubble bath to massage the inner side of the foot
- Ergonomically arranged air bubble nozzles
- Removable massage rollers in the area of the soles
- Good heat insulation through double-walled casing
- Intensive reflexology
- Convenient size (suitable up to shoe size 46)

Package content

- Foot spa
- Massage rollers

- Size: approx. 38,6 x 24,3 x 45,9 cm
- Weight: approx. 2,9 kg
- Power output: 390 watts
- Power supply: 220-240V/50 Hz

Art.-No.: 88378
EAN: 40 15588 88378 1

WBB
FOOT SPA

- 2-in-1: bubble and dry massage
- 3 selectable massage programmes
- Automatic heat function
- Ergonomically arranged air bubble nozzles
- 2 changeable massage roller sets (e.g. for acupressure massage)
- Integrated fragrance dispenser for scented oils
- Good heat insulation through double-walled casing
- Intensive reflexology
- Convenient size (suitable up to shoe size 46)

Package content

- Foot spa
- 2 massage roller sets

- Size: approx. 47 x 40 x 23 cm
- Weight: approx. 3,0 kg
- Power output: 106 watts
- Power supply: 230-240 V/ 50 Hz

Art.-No.: 88373
EAN: 40 15588 88373 6

FOOT SPA

- 2-in-1: bubble and dry massage
- 2 selectable massage programmes
- Automatic heat function
- Integrated massage rollers and massage balls
- Intensive reflexology
- Convenient size (suitable up to shoe size 46)

Package content

- Foot spa

- Size: approx. 40 x 32 x 17 cm
- Weight: approx. 1,7 kg
- Power output: 62 Watt
- Power supply: 230-240 V/50 Hz

Art.-No.: 88391
EAN: 40 15588 88391 0

BBS
BATH SPA

- Relaxing air bubble bath to stimulate blood circulation and to relieve muscles
- Automatic heat function
- Intensive heat function selectable
- Massage/bubble function with 3 intensity levels
- Intensity levels adjustable on the device or via remote control
- Timer function: 10/20/30 minutes
- Non-slip soft mat for lying comfort
- Suitable for any bath tub
- Integrated fragrance dispenser for scented oils
- Extra quiet
- Double safety valve for air hose and device

Package content

- Motor unit • Soft mat
- Air hose • Remote control
- 3 aroma dispensers

- Size: - Soft mat: approx. 120 x 36 cm
- Air hose: approx. 2,4 m
- Motor unit: approx. 31 x 21 x 31 cm
- Weight: approx. 4,3 kg (total)
- Power output: 570 watts
- Power supply: 220-240 V/50 Hz, remote control: 3 V CR2032

HP 605 HEAT PAD

- 4 temperature settings
- Turbo heat with powerful 100 watts
- Automatic switch-off after 90 minutes
- Safety system with overheating protection
- Ergonomically designed controller with LED control display on both sides for right and left-handed persons
- Removable cover of cotton
- Cover machine-washable at 30°C
- Ultra-soft breathable cushion
- Cushion washable thanks to detachable controller

HKS HEAT PAD

- Flexible heating wires and a matrix sensor system for even heat distribution
- 4 temperature settings
- Turbo heat with powerful 100 watts
- Automatic switch-off after 90 minutes
- "APS" technology – Active protection system: visual and acoustic temperature control
- Ergonomically designed controller with LED temperature display on both sides for right and left-handed persons
- Removable cover of pleasantly soft upper material
- Cover machine-washable at 40°C
- Ultra-soft breathable cushion
- Cushion washable thanks to detachable controller

HKC HEAT PAD

- Flexible heating wires and a matrix sensor system for even heat distribution
- 4 temperature settings
- Turbo heat with powerful 100 watts
- Automatic switch-off after 90 minutes
- "APS" technology – Active protection system: visual and acoustic temperature control
- Ergonomically designed controller with LED temperature display on both sides for right and left-handed persons
- Removable cover of pleasantly soft upper material
- Cover machine-washable at 40°C
- Ultra-soft breathable cushion
- Cushion washable thanks to detachable controller

HP 615 HEAT PAD incl. exchangeable cover

- Flexible heating wires and a matrix sensor system for even heat distribution
- 4 temperature settings
- Turbo heat with powerful 100 watts
- Automatic switch-off after 90 minutes
- "APS" technology – active protection system: visual and acoustic temperature control
- Ergonomically designed controller with LED control display on both sides for right and left-handed persons
- Removable cover of cosy and soft upper material
- Cover machine-washable at 40°C
- Ultra-soft breathable cushion
- Cushion washable thanks to detachable controller
- Incl. exchangeable microfibre cover

HP 610 HEAT PAD FOR NECK AND BACK

- 4 temperature settings
- Turbo heat with powerful 100 watts
- Automatic switch-off after 90 minutes
- Safety system with overheating protection
- Ergonomically designed controller with LED control display on both sides for right and left-handed persons
- Removable cover of cotton
- Cover machine-washable at 30°C
- Ultra-soft breathable cushion
- Cushion washable thanks to detachable temperature controller
- Perfect fit for the back and neck
- Convenient velcro strap for individual fastening of the cushion

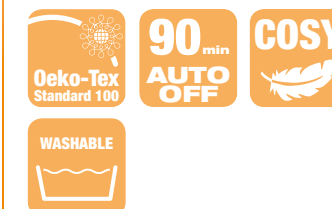

HP 620 HEAT PAD FOR NECK AND SHOULDER

- Flexible heating wires and a matrix sensor system for even heat distribution
- 4 temperature settings
- Turbo heat with powerful 100 watts
- Automatic switch-off after 90 minutes
- "APS" technology – Active protection system: visual and acoustic temperature control
- Ergonomically designed controller with LED temperature display on both sides for right and left-handed persons
- Washable thanks to detachable controller
- Fluffy soft uppermaterial
- Flexible shape allows individual adjustment to any shoulder size
- Comfortable to wear without annoying buttons

FWS FOOT WARMER

- 3 temperature settings
- Turbo heat with powerful 100 watts
- Automatic switch-off after 90 minutes
- Safety system with overheating protection
- Ergonomically designed controller with LED control display
- Removable fluffy soft lining
- Lining machine washable at 30°C
- Extra-soft breathable core
- Oeko-Tex® Standard 100
- Large foot space (suitable up to shoe size 46)

HU 650 HEATED UNDERBLANKET

- Convenient heated underblanket with stretch function for easy attachment to the mattress
- 4 temperature settings
- Turbo heat with powerful 100 watts
- Two warming zones for body and feet
- Safety system with overheating protection
- Automatic switch-off after 180 minutes
- Ergonomically designed controller with LED control display
- Washable thanks to detachable controller
- Upper material of high-quality cotton
- Suitable for mattress sizes 200 x 90–100 cm

Package content

- Heat pad
- Heat pad cover
- Controller

- Size: approx. 40 x 33 cm

Home therapy with MEDISANA.

A quick and simple way to improve one's quality of life. With the gentle effects of air and light.

For on-going complaints such as respiratory diseases **HOME THERAPY** is especially an important part of medical treatment. The patient can take care of himself/herself if needed, in consultation with the family doctor. It is increasingly common that patients assume more responsibility in the self-treatment of e.g. chronic diseases and conditions by means of efficient, safe and affordable products. Home therapy includes amongst others inhalation devices and light and pain therapy products.

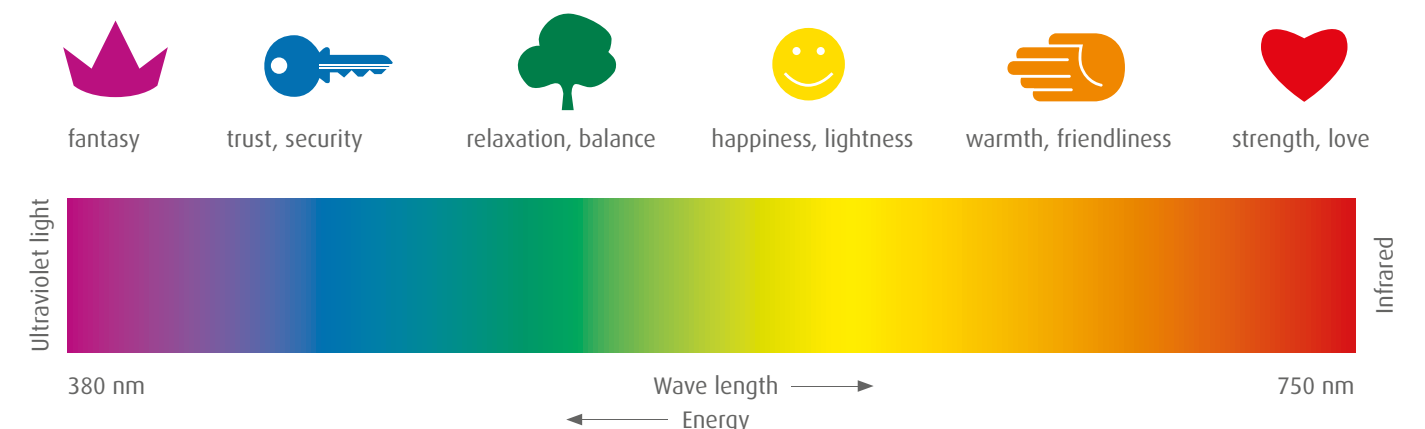

INHALATION: More and more people are suffering from asthma or chronic bronchitis. In Germany both are among the most common diseases in childhood. Thus, 10-15% of children in industrialized countries are affected. When asthma or chronic bronchitis is diagnosed, inhalation therapy with aerosols can help. An aerosol is a mixture of gas and particles, comparable

with a mist that is swirled by inhalators. The inhalers thereby atomize the drug, so that it can penetrate into the respiratory tract. It immediately and directly acts upon the diseased location.

Inhalation is also ideal as a preventive measure.

LIGHT THERAPY/PAIN THERAPY: More than 15 million people in Germany suffer from chronic pain such as back pain and migraine. Often they search for years in vain for causes and for the alleviation of their suffering.

Light therapy proves to be increasingly used as a way out of this pain, also when the causes are psychological in nature. Because light influences our well-being by acting on the body and the mind. Each spectral colour works in a certain way. Well beyond the visible range light has therapeutic properties for medical use. This is precisely the case e.g. with infrared light, which solves spasms and tension, relieves pain and gives strength, both through heat and wavelength.

Spectral colours/visible light: light therapy uses both the physical and the psychological effects of light and colour on people

Finer atomization
Higher effectiveness

Higher effectiveness

Extra long hose (2 m)

Inhalator IN 550 Pro

For targeted treatment of diseases of the upper and lower respiratory tract

Highly efficient due to very precise nebulisation

Inhalation with mask, mouthpiece or nose adapter – ideal for children

Certified medical device

Inhalation – well targeted action

Different types of inhaler technology have proven successful for the treatment of respiratory diseases. The most widely used is compressed air technology, which is also used in the inhalers used by MEDISANA. The compressed air produced by a compressor nebulizes water and dissolves a drug into tiny droplets therein that is absorbed through the respiratory air. The produced inhalant has a particularly respirable aerosol content – achieved by the small particle size. The finer the atomization is, the better the inhalant can penetrate into the narrow branches of the upper and lower airways and thus bring the drug to where it needs to work.

Infrared lamp IR 885

Intensive infrared light to relax muscles or treat colds

Stimulates blood circulation

Relieves pain

Timer (15 to 1 minute)

Certified medical device*

Infrared light – a universal cure

The infrared lamp IR 885 is a universally usable, certified medical device, in accordance with MDD – its warm light promotes blood circulation, loosens local muscular tension, relieves pain and helps with the treatment of colds. By means of the 35° tilt angle of the lamp all body regions can be "treated" either extensively or specifically.

A timer, adjustable for a period of 1 to 15 minutes, allows for a correct dosage, as well as comfortable and safe use at home.

IN 500 Compact
INHALATOR

- Nebulisation with compressed air technology
- For targeted treatment of diseases of the upper and lower respiratory tract (e.g. asthma and cold)
- Highly efficient due to very precise nebulisation
- Particularly effective thanks to high proportion of respirable aerosols
- Comprehensive set of accessories: Inhalation with mask, mouthpiece or nose adapter – ideal for children
- Extra long hose – 2 m
- Certified medical device*

Package content

- Inhalator • Mouth piece
- Masks for children and adults
- Connecting piece
- Nose adapter for children and adults
- 5 replacement filters
- Size: approx. 19,5 x 13,5 x 9,2 cm
- Weight: approx. 1,3 kg
- Power output: 60 Watt
- Power supply: 230V/50 Hz
- Filling volume inhalant: max. 10 ml
- Nebulizing output: $\leq 0,2$ ml/min
- Particle size: $>60\% \leq 5 \mu\text{m}$
- Hose length: 2 m

Art.-No.: 54520
EAN: 40 15588 54520 7

USC
ULTRASONIC INHALATOR

- For targeted treatment of diseases of the upper and lower respiratory tract (e.g. asthma and cold)
- High efficiency through innovative micro-membrane nebulisation (mesh technology) with ultrafine droplets
- Particularly effective thanks to high proportion of respirable aerosols
- Inhalation with mask or mouthpiece – also eminently suitable for children
- Low-noise nebulisation
- Comprehensive set of accessories
- Certified medical device*

Package content

- Ultrasonic Inhalator
- Storage pouch
- Mouth piece
- Masks for children and adults
- Connecting piece
- Batteries
- Size: approx. 14,2 x 7,5 x 7,5 cm
- Weight: approx. 0,3 kg
- Batteries: 4 x 1,5 V (AA)
- Filling volume inhalant: max. 8 ml
- Nebulizing output: approx. 0,4 ml/min
- Average particle size: 4,8 μm

TDP
PAIN THERAPY DEVICE

- 4 different applications: TENS, EMS, Deep TENS, acupuncture
- Storage of individual settings possible
- Automatic switch-off at the end of the programme
- Automatic switch-off after 10 seconds of non-use
- LCD display with backlight
- Two separately adjustable channels with four electrodes
- Safety circuit for electrode control
- Battery level indicator
- With storage pouch
- Certified medical device*

Package content

- Pain therapy device
- 4 electrodes
- 2 connecting cables
- Batteries
- Storage pouch
- Size: approx. 11,5 x 6,7 x 3,5 cm
- Weight: approx. 0,1 kg
- Batteries: 4 x 1,5 V (AAA)
- Channels: 2
- Curve form: symmetrical, bi-phasic, mono-phasic
- Output: constant current
- Intensity: in 60 steps from 0 to 60 mA
- Frequency: 2 – 120 Hz, depending on the programme
- Pulse width: 50 – 400 µs, depending on the programme

Art.-No.: 88310
EAN: 40 15588 88310 1

BOB
ABDOMINAL MUSCLE
STIMULATOR

- Flexible abdominal belt with inbuilt electrodes
- 10 programs to choose from
- 25 intensity levels to choose from
- Automatic switch-off at the end of the programme
- Can be worn under clothing thanks to the flat design
- Device is integrated into the belt – no annoying cables
- Certified medical device*

Package content

- Abdominal muscle stimulator
- Batteries
- Size: approx. 110 x 14,4 x 2,2 cm (incl. abdominal belt)
- Weight: approx. 0,23 kg
- Batteries: 3 x 1,5 V (AAA)
- Channels: 1
- Curve form: bi-Phase square wave pulse
- Intensity: 0 – 90mA
- Frequency: 3 – 100 Hz
- Pulse width: 150 – 200 µs

Art.-No.: 88320
EAN: 40 15588 88320 0

LCS
ELECTRIC LICE COMB

- Simple combing frees hair from head lice and nits
- The lice are destroyed by an electrical current upon contact with the teeth of the comb
- Also suitable for dogs and cats
- No side effects, and no use of chemical agents

Package content

- Electric lice comb
- Battery
- Size: approx. 17,3 x 6,3 x 2,3 cm
- Weight: approx. 75 g
- Battery: 1 x 1,5 V (AA)

The healthy home – with MEDISANA.

Cleans the air that we breathe from particulate matter, fine dust, bacteria, pollen and odours. Live healthier from now on.

TO LIVE HEALTHILY has become more important in recent years. Naturalness, tolerability and sustainability are the new maxims of our thinking, acting and buying. In particular, life with children makes people more aware of the pollution of our environment. In addition it is very easy to live more healthily starting the next day with the air cleaning and air humidification of MEDISANA.

The air that we breathe is often very polluted. Human influence on the air that he breathes is multi-faceted and essentially without geographical limitations.

AIR POLLUTION is tricky, because it is 99% invisible, but it is omnipresent. Hardly anyone lives and works so isolated that all pollution can be excluded. The air we breathe is clearly loaded with particulate matter, dust, soot, pollen, bacteria and odours, even if only one of the factors shown above for the environment applies. In addition, pollutants can travel thousands of kilometres with the wind, without losing effect. At the same time clean air is a basic condition for a healthy life.

Indoor air is still subject to further pollutants. House dust, moulds, dust mite faces, the exhaust of printers and poorly filtered vacuum cleaners, carpet wear and cigarette smoke are just a few examples. With no other nutrition element would this level of contamination be tolerated.

MEDISANA has many years of experience in the field of inhalation, humidification and aroma diffusion. While its original focus was to improve the living conditions of people suffering from allergies and respiratory diseases, MEDISANA aims to provide solu-

tions for the creation of healthier breathing air for all people with the products of its new range "Healthy Home." Through humidification and highly efficient filtering the indoor air quality is improved noticeably.

NEW

MEDISANA AIR® Room air purifier

Cleans room air using an antibacterial particulate filter from **3M**® and additional activated carbon filter

Cleans the air of particulates, dust, pollens, odours and bacteria

Allergy-friendly

Particularly effective and quiet with low power consumption

Simple and safe to use thanks to the LED filter change indicator

Switches automatically between the day and night modes (even quieter)

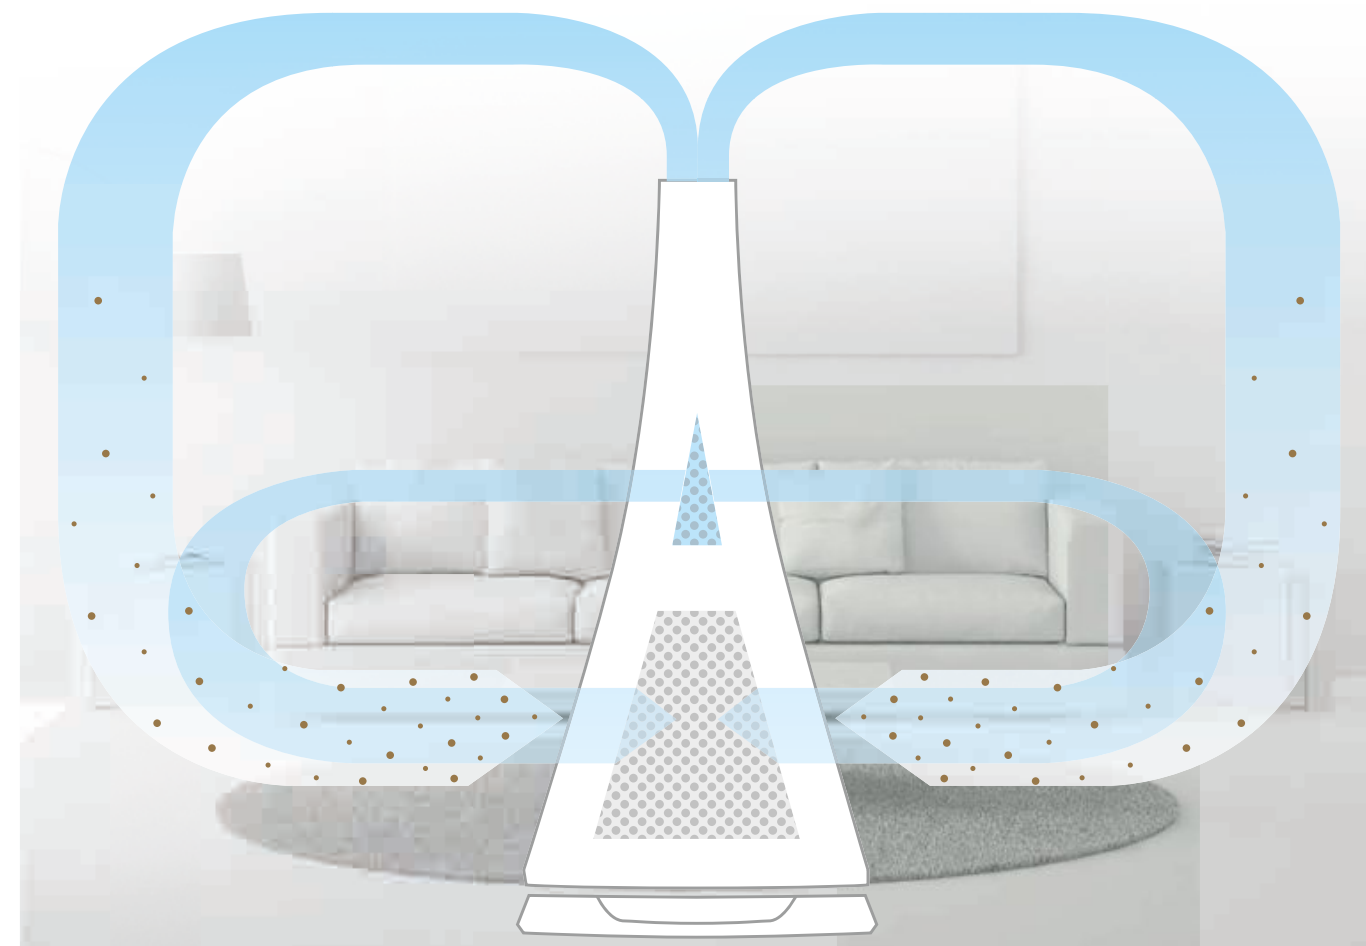

Operated using the included power supply unit and USB cable

Digital motor with an extra long operating life

MEDISANA AIR® dust indicator light:

Blue: full filter performance
Yellow: reduced filter performance
Red: change filter

MEDISANA AIR® works on the convection principle and generates an exchange of air

20 m² = 3 × /24 h

40 m² = 1,5 × /24 h

60 m² = 1 × /24 h

Medisana Air® – improves the quality of the air that we breathe

With MEDISANA AIR® MEDISANA presents its first indoor air purifier. It purifies the air continuously and effectively from particulate matter, dust, pollen, bacteria and even smells.

At the core of MEDISANA AIR® is its antibacterial particulate filter from **3M**® and additional activated carbon filter. The patented LED dust light ensures that the air is optimally filtered and it displays if filter performance is deteriorating or the filter needs to be changed. MEDISANA AIR® works on the convection principle and promotes the exchange of air.

A quieter, more durable and energy-efficient digital motor enables the elegant air purifier to purify the air volume in an interior of about 60 m² once every 24 hours and the air volume in rooms of approximately 20 m² up to three times every 24 hours.

MEDISANA AIR® switches automatically from day mode to a very quiet night mode. Thus, the innovative air purifier is an efficient way of providing fresh air in enclosed spaces around the clock.

Welcome to a healthy home!

* Fine dust particulate filter and anti-bacterial filter manufactured by 3M Korea

NEW

Air humidifier AH 660

ultrasound technology to improve the breathing air quality

High efficiency through micro-fine atomisation

Steplessly adjustable misting levels

Automatic shut-off when the tank is empty

Low-noise and energy-saving

Incl. water filter

For rooms up to approx. 30 m²

Inclusive water filter

Aroma diffuser for fragrant oils

Using ultrasound technology, creates a fine mist of fragrance that spreads throughout your entire room

High efficiency through micro-fine atomisation

Touch control buttons

Automatic shut-off when the tank is empty

LED time display

Wellness light with colour-changing in 3 colours

Timer for programming operation: 30/60/120/180 minutes

Low-noise and energy-saving

NEW

LED WELLNESS LIGHT

Simply determine the air humidity yourself

Those prone to allergies especially suffer from the effects of dry heated air. With the MEDISANA humidifier the humidity of the indoor environment can be set to the personal needs of the user. Atomized microfine through ultrasound technology, the saturation of the air with water can be regulated smoothly and thus naturally. The result: mucous membranes are protected from drying out, the eyes and respiratory tract are less irritated and breathing is easier.

More atmosphere for rooms – with fragrance and light

All functions of the MEDISANA aroma diffuser can be selected conveniently via touch control. These include the start and duration of the aroma diffusion and colour effects of the spa light. The AD 640 enables the user to create an individual, comfortable and healthy ambience in his living room and bedroom.

Using the fragrance oil is easy and safe. Thanks to modern LED technology and an efficient digital motor, the elegant aroma diffuser operates in an energy-saving and quiet manner.

Aroma diffuser AD 620

Aroma diffuser for fragrant oils

Using ultrasound technology, creates a fine mist of fragrance that spreads throughout your entire room

LED WELLNESS LIGHT

Aromatherapy is a natural subtle treatment of the whole person. It stimulates different body systems and affects moods. Common reactions are pain relief, anxiety reduction, improved energy efficiency, increased short-term memory, higher stress resistance and relaxation. Frequently physical symptoms are also cleared up as a result, e.g. people with allergies or skin diseases.

Through ultrasonic atomization of aromas, the MEDISANA aroma diffusers provide a uniformly discreet charging of the room air. Whether refreshing or relaxing: in conjunction with softly changing wellness light a very individual atmosphere of well-being is created - the basis for better quality of life and health

MEDISANA AIR ROOM AIR PURIFIER

- Cleans room air using an antibacterial particulate filter (F9>PM2.5) from 3M® and additional activated carbon filtering; allergy-friendly
- Frees the air of particulates, dust, pollens, odours and bacteria
- Particularly effective and quiet with low power consumption
- Simple and safe to use thanks to the LED filter change indicator
- Switches automatically between the day and night modes (even quieter)
- Operated using the included power supply unit and USB cable
- Digital motor with an extra long operating life – 5 year warranty*
- For rooms up to approx. 60 m²

Package content

- Room air purifier with 3M® filter
- USB cable (on device) and mains adapter
- Instruction manual
- Size: approx. 14,8 x 14,8 x 30,7 cm
- Weight: approx. 0,6 kg
- Power output: 1,5 watts
- Power supply: DC 5V/300mA
- Purifying output: 60m²/24h
- Cable length: approx. 100 cm

AH 660 AIR HUMIDIFIER

Available
Q4 2014

- Air humidifier with ultrasound technology to improve the breathing air quality
- High efficiency through micro-fine atomisation
- Steplessly adjustable misting levels
- Removable tank
- Automatic shut-off when the tank is empty
- Low-noise and energy-saving: 30 watts
- Incl. water filter
- For rooms up to approx. 30 m²

Package content

- Air humidifier
- Mains adapter
- Instruction manual
- Size: approx. 24 x 17 x 36 cm
- Weight: approx. 1,3 kg
- Power output: 30 watts
- Power supply: 220-240 V/50-60 Hz
- Water tank capacity: 4.500 ml
- Max. nebulizing output: 300ml/h
- Max. operating time: 15 hours

UHW AIR HUMIDIFIER

- Air humidifier with ultrasound technology to improve the breathing air quality
- High efficiency through micro-fine atomisation
- Steplessly adjustable misting levels
- Automatic shut-off when the tank is empty
- Low-noise and energy-saving
- For rooms up to approx. 30 m²

Package content

- Air humidifier
- Mains adapter
- Size: approx. 26,5 x 33 x 20 cm
- Weight: approx. 1,46 kg
- Power output: 30 watts
- Power supply: 220-240 V/50-60 Hz
- 4.200 ml water tank
- Max. nebulizing output: 300ml/h
- Variable operating time depending on setting

MEDIBREEZE AIR HUMIDIFIER

- Air humidifier with ultrasound technology to improve the breathing air quality
- High efficiency through micro-fine atomisation
- 2 intensity levels to choose from
- Switchable lights
- Automatic shut-off when the tank is empty
- Low-noise and energy-saving
- For rooms up to approx. 10 m²

Package content

- Air humidifier
- Mains adapter
- Size: approx. 16 x 11 x 20 cm
- Weight: approx. 1 kg
- Power output: 14 watts
- Power supply: 100-240 V/50-60 Hz/0,5 A; 13,5V DC 1A
- 680 ml water tank
- Max. nebulizing output: 80ml/h
- Operating time (with 500 ml water):
Level 1 – approx. 9 hours
Level 2 – approx. 6 hours

MINIBREEZE AIR HUMIDIFIER

- Air humidifier with ultrasound technology to improve the breathing air quality
- High efficiency through micro-fine atomisation
- Steplessly adjustable misting levels
- Any standard plastic bottle (max. 0.5 l) can be used as removable water tank (bottle not included)
- Automatic shut-off when the tank is empty
- Low-noise and energy-saving
- Ideal for operation at home, in the office or when travelling
- Adjustable pedestals for optimal stability
- Including storage bag
- For rooms up to approx. 12 m²

Package content

- Air humidifier
- Adapter for standard plastic bottles
- Mains adapter
- Storage bag
- Size: approx. 12,5 x 7,2 x 9,0 cm
- Weight: approx. 0,3 kg
- Power output: 12 watts
- Power supply: 100-240 V/50-60 Hz/0,5 A; 24V DC 500mA
- 500 ml water tank recommended
- Max. nebulizing output: 50 – 100 ml/h
- Operating time (with 500 ml water): approx. 5 – 10 hours

ULTRABREEZE AIR HUMIDIFIER WITH TIMER FUNCTION

- Air humidifier with ultrasound technology to improve the breathing air quality
- High efficiency through micro-fine atomisation
- 2 intensity levels to choose from
- Timer for programming the misting start and duration
- Pre-heating to kill germs and bacteria
- Switchable lights
- Automatic shut-off when the tank is empty
- Low-noise and energy-saving
- Integrated clock with alarm function
- For rooms up to approx. 8 m²

Package content

- Air humidifier with timer function
- Mains adapter
- Size: approx. 19,6 x 13,5 x 25,6 cm
- Weight: approx. 1,1 kg
- Power output: 36 Watt
- Power supply: 100 – 240 V/50 Hz/1,5 A, 24 V DC 1,5A
- 1.300 ml water tank
- Max. nebulizing output: 65ml/h
- Operating time (with 1300 ml water):
Level 1 – approx. 20 hours
Level 2 – approx. 30 hours

Personal Care with MEDISANA.

Personal care has never been so pleasant. Beauty has never been more attentively cared for. The two have never worked together so well hand in hand.

BEAUTY PROVIDES SECURITY, therefore each person values a well-groomed appearance. Beauty centres and salons are booming. At the same time it is so easy, quick and safe to take charge of care and beauty oneself. MEDISANA has been offering professional care and beauty products for home use for many years for use at home. They are practical, concise and safe to use. Products for skin care, for manicures and pedicures, as well as products for hair removal.

Female interest in personal care and cosmetic themes always starts earlier and declines more slowly with age.

HAIR REMOVAL, SKIN AND NAIL CARE. MEDISANA also understands that beauty is the result of proper care. Accordingly, product developments are strictly oriented towards the needs of the market for body care. In addition, both the needs of professional body care as well as the preferences of the end consumers are crucial.

Regular hair removal has become an integral part of body care. Questions about how and how often are still answered very differently by respondents. Haarentfernung durch Epilation gehört wegen seiner lang anhaltenden Wirkung zu den bevorzugten Methoden. Because of its long-lasting effect, hair removal by epilation counts as one of the preferred methods. The latest generation of epilation of MEDISANA IS gentler than ever before.

Hair removal methods of German women (2013).

Effectiveness of different hair removal products.

Whether epilation, skin or nail care - safe and pain-free applications have priority. Despite the suitability of many products, even those for diabetics insensitive to pain, a regular, but moderate and careful application is recommended. Incidentally, the growth of hair and nails is influenced not only by age and gender, but also by metabolism, hormones, diet, smoking, sleep quantity and temperature. Personal care and proactive health care should therefore always be coordinated.

Cellulite massager AC 850

Effective massage to stimulate the connective tissue for noticeably firmer skin

Improves blood circulation

2 selectable massage intensities

The 3 x 2 rotating massage heads can be operated with two intensities. They are removable and easy to clean.

Cellulite massage – firming, hygienic, handy

The AC 850 is an effective and convenient form of self-massage to improve the connective tissue and the skin's appearance. Its circulation-promoting effect is the basis for a noticeably firmer skin. At the same time one can choose between two levels of massage intensity. By means of the 3 x 2 rotating massage heads and the strong motor the tissue is optimally stimulated. Thanks to its ergonomic design and the individually adjustable handle, the AC 850 is easy and safe to handle.

2in1 cosmetics mirror CM 840

- Stable base
- Swivelling mirrors: normal and 5x magnification
- High-quality chrome finish
- Bright LED light (16 white LEDs)

More light, more details

With the LED cosmetic mirror daily facial care at home can now be undertaken just as professionally as at the beautician. Thanks to the large mirror area that can be magnified up to five times, as well as the uniform illumination through a ring of energy-saving white LEDs care extends deep into the pores and precisely.

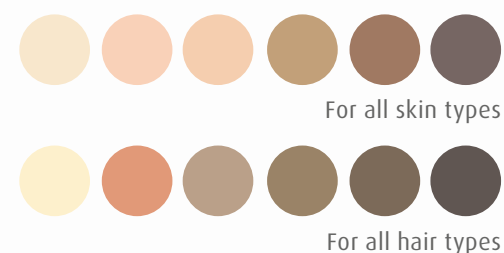

Manicure and pedicure device MP 820

- With LED light for accurate application
- Continuous speed adjustment
- High quality and durable sapphire attachments
- Clockwise and counter-clockwise rotation

Gentle, precise, safe, beautiful

This allows you to safely and securely perform your nail care. Like all products, the new MP 820 is equipped with abrasion-resistant sapphire grinding tools and has an adjustable speed. The automatic stop in case of excessive pressure is particularly suitable for diabetics, where the sensation of pain has subsided.

iluminage Touch – Permanent hair reduction

The safe and effective technology for permanent hair reduction

Applicable for all skin types (I-VI) on the body and on the face

Full body treatment in ca. 30 min.

Up to 70% hair reduction after only 7 treatments

200,000 light pulses for a treatment period of approximately 10 years

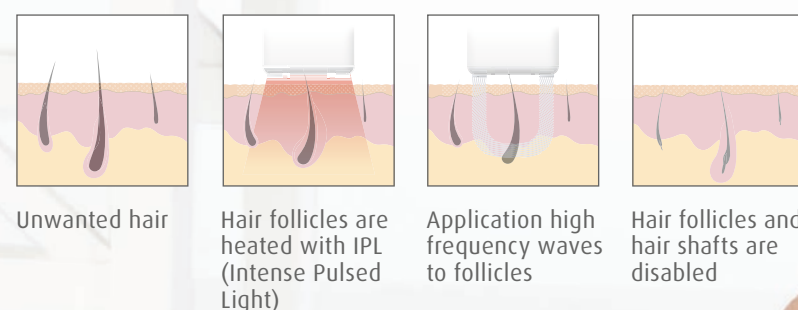

Clinically tested

NEW

The user can select between 3 intensity levels from the access point of iluminage Touch depending on the area of application.

iluminage Touch – High tech against unwanted hair

iluminage touch reduces body hair safely, effectively and permanently – for all skin and hair types – with an innovative combination of IPL (Intense Pulsed Light) and RF (radio frequency) technology. The light penetrates deep beneath the skin, inhibits hair follicle growth and slows down new hair growth. In this fashion hair growth is permanently reduced through regular use. You will be able to both see and feel the effects of diminished hair growth after just 7 weeks of weekly treatments. Thereafter, only a few targeted applications are required to keep skin free of hair. iluminage Touch operates so gently at all three selectable levels of intensity that it can be applied all over the body, including, thanks to the reduction attachment, to the face. With its extra large light surface it quickly and gently treats parts of the body such as the armpit in only 1 minute, the face in only 2 minutes and the whole body in only 30 minutes. iluminage Touch has been clinically tested.

EAN: 40 15588 51095 3

USB CABLE AND SOFTWARE
FOR BLOOD PRESSURE MONITOR MTX

Art.-No.: 51082
EAN: 40 15588 51082 3

PROTECTIVE SLEEVES
FOR THERMOMETER FTX
(50 Pieces)

Art.-No.: 76111
EAN: 40 15588 76111 9

ACCESSORIES
FOR BLOOD GLUCOSE MONITORS

Control solution for MediTouch/GlucoDock
Art.-No.: 79029
EAN: 40 15588 79029 4

Control solution for MediTouch 2
Art.-No.: 79039
EAN: 40 15588 79039 3

Lancing device
Art.-No.: 79002
EAN: 40 15588 79002 7

Test strips for MediTouch
Art.-No.: 79027
EAN: 40 15588 79027 0

Test strips for MediTouch 2
Art.-No.: 79038
EAN: 40 15588 79038 6

Test strips for GlucoDock
Art.-No.: 79310
EAN: 40 15588 79310 3

Lancets for MediTouch/MediTouch 2
Art.-No.: 79028
EAN: 40 15588 79028 7

Lancets for GlucoDock
Art.-No.: 79315
EAN: 40 15588 79315 8

THERAPY

ELECTRODES
FOR PAIN THERAPY DEVICES

Adhesive pads for Medistim and Medistim
Duo (standard electrode approx. 70 x 50 mm)
Art.-No.: 81820
EAN: 40 15588 81820 2

Adhesive pads for Medistim and Medistim
Duo (special electrode approx. 70 x 30 mm)
Art.-No.: 81810
EAN: 40 15588 81810 3

Multiple electrodes for pain therapy
devices TDD, TDP and TED (4 electrodes
approx. 30 x 50 mm)
Art.-No.: 87080
EAN: 40 15588 87080 4

Multiple electrodes for pain therapy
devices TDD, TDP and TED (2 electrodes
approx. 50 x 90 mm)
Art.-No.: 87100
EAN: 40 15588 87100 9

Durable electrodes for pain therapy
devices TDD and TED
(4 electrodes approx. 40 x 40 mm)
Art.-No.: 13586
EAN: 40 15588 13586 6

Multiple electrodes for back pain
therapy system TDB (4 electrodes
approx. 50 x 50 mm with adhesive
surface on both sides)
Art.-No.: 86359
EAN: 40 15588 86359 2

Electrode gel for wearable
electrodes TDD and TED
Art.-No.: 12943
EAN: 40 15588 12943 8

ELECTRODES
FOR BODYTONER

Electrodes round for BTS
Art.-No.: 87102
EAN: 40 15588 87102 3

CABLE
FOR PAIN THERAPY DEVICES

Cable set for TDB
Art.-No.: 86358
EAN: 40 15588 86358 5

Patient cables for wearable electrodes
for TDD (2 Pieces)
Art.-No.: 13585
EAN: 40 15588 13585 9

Patient cables for multiple electrodes
for TDD (2 Pieces)
Art.-No.: 87030
EAN: 40 15588 87030 9

Cable set for TDP
Art.-No.: 88315
EAN: 40 15588 88315 6

HEPA FILTER
FOR AIR PURIFIER APS

Art.-No.: 54510
EAN: 40 15588 54510 8

REPLACEMENT CABLES
FOR AIR PURIFIER APS
(3 Pieces)

Art.-No.: 54512
EAN: 40 15588 54512 2

UV LAMP
FOR AIR PURIFIER APS

Art.-No.: 54513
EAN: 40 15588 54513 9

SPARE LAMPS
FOR INFRARED LAMPS

Spare lamp for IRH (100 watts)
Art.-No.: 30101
EAN: 40 15588 30101 8

Spare lamp for IRL (150 watts)
Art.-No.: 88256
EAN: 40 15588 88256 2

Lamp for IR 885 (300 watts)
Art.-No.: 88259
EAN: 40 15588 88259 3

ACCESSORIES
FOR INHALATORS

Mask set for USC
Art.-No.: 54101
EAN: 40 15588 54101 8

Mouthpiece for USC
Art.-No.: 54102
EAN: 40 15588 54102 5

Covering cap for USC
Art.-No.: 54103
EAN: 40 15588 54103 2

Medication tank with nebulizer kit
for USC (as of LOT 09/09)
Art.-No.: 54104
EAN: 40 15588 54104 1

Air filter and nebulizer kit for IN 500/
IN 550
Art.-No.: 54525
EAN: 4015588 54525 2

Mouthpiece and nose adapter (for adults
and children) for IN 500/IN 550
Art.-No.: 54526
EAN: 4015588 54526 9

Air hose for IN 500/IN 550
Art.-No.: 54527
EAN: 4015588 54527 6

Mask for children for IN 500/IN 550
Art.-No.: 54528
EAN: 4015588 54528 3

Mask for adults for IN 500/IN 550
Art.-No.: 54529
EAN: 4015588 54529 0

HEALTHY HOME

ANTIBACTERIAL PARTICULATE FILTER
WITH ACTIVATED CARBON FILTERING
FOR AIR PURIFIER MEDISANA AIR®

1 Piece
Art.-No.: 60390
EAN: 40 15588 60390 7

2 Pieces
Art.-No.: 60391
EAN: 40 15588 60391 4

WATER FILTER
FOR AIR HUMIDIFIER AH 660

2 Pieces
Art.-No.: 60069
EAN: 40 15588 60069 2

AROMA ESSENCES
FOR AROMA DIFFUSERS AND
AIR HUMIDIFIERS

10 ml lemon fragrance
Art.-No.: 60030
EAN: 40 15588 60030 2

10 ml eukalyptus fragrance
Art.-No.: 60031
EAN: 40 15588 60031 9

10 ml lavender fragrance
Art.-No.: 60032
EAN: 40 15588 60032 6

10 ml citronella fragrance
Art.-No.: 60033
EAN: 40 15588 60033 3

10 ml rose fragrance
Art.-No.: 60034
EAN: 40 15588 60034 0

10 ml aloe fragrance
Art.-No.: 60035
EAN: 40 15588 60035 7

10 ml peppermint fragrance
Art.-No.: 60036
EAN: 40 15588 60036 4

10 ml orange fragrance
Art.-No.: 60037
EAN: 40 15588 60037 1

10 ml pinewood fragrance
Art.-No.: 60038
EAN: 40 15588 60038 8

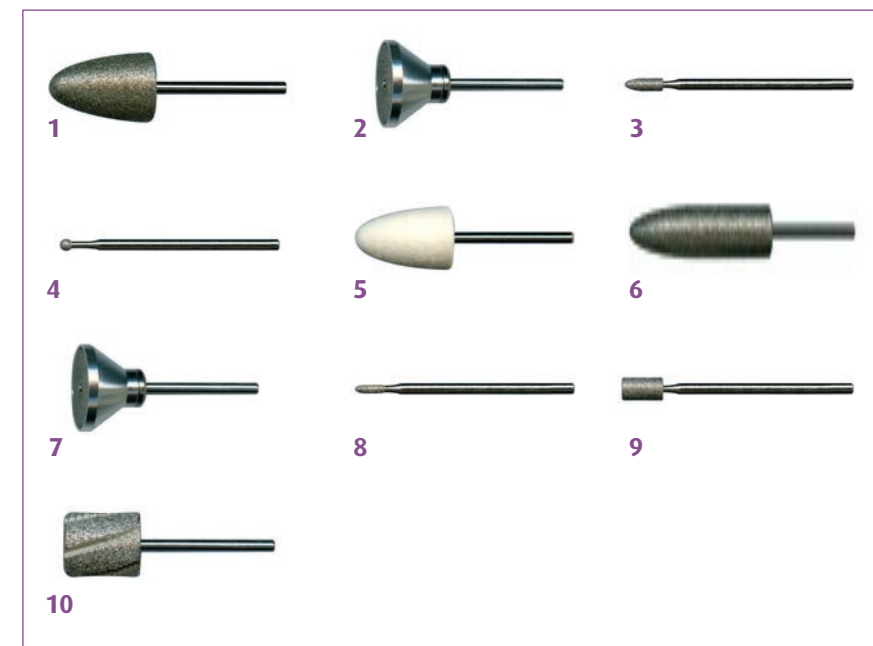

10 ml wildberries fragrance
Art.-No.: 60039
EAN: 40 15588 60039 5

10 ml oceanbreeze fragrance
Art.-No.: 60040
EAN: 40 15588 60040 1

PERSONAL CARE

**SET OF ATTACHMENTS (10 PCS.)
FOR MANICURE AND PEDICURE
DEVICES MANILUX L/S AND MP 820**

Art.-No.: 85450
EAN: 40 15588 85450 7

1 Coarse sapphire cone
For callused and rough skin on feet and hands but also for abrading very thick, hard nails. It re-shapes crooked nails and relieves painful pressure.

2 Coarse sapphire disc
Shortens and shapes nails right into the corners.

3 Flame burr
For careful release of ingrown nails. It is also possible to remove fungal spores from under the front edge of the nail.

4 Sapphire ball burr
For grinding out ingrown nails.

5 Felt cone
The attachment for final finishing of all nail care. Finger and toe nails are buffed to a natural shine.

6 Long sapphire cone
For large-surface abrasion of thick callus formation and rough skin.

7 Fine sapphire disc
For shortening the nails by filing.

8 Needle burr
For getting rid of difficult corners and edges which are hard to get at with thicker files and for carefully freeing ingrown nails.

9 Cylindrical burr
For treating thickened, tough nails. Pressure is relieved. Also suitable for working on the hard edges of corns to relieve pressure.

10 Drainage grinder
Particularly suitable for treating extensive, thick callus on heels and balls of feet where thick callus frequently forms.

**ATTACHMENTS
FOR MANICURE AND PEDICURE
DEVICES MEDISTYLE L+S/MPS**

Felt cone
Art.-No.: 85001
EAN: 40 15588 85001 1

Coarse sapphire cone
Art.-No.: 85003
EAN: 40 15588 85003 5

Fine sapphire disc
Art.-No.: 85004
EAN: 40 15588 85004 2

Sapphire ball burr
Art.-No.: 85005
EAN: 40 15588 85005 9

Long needle burr
Art.-No.: 85006
EAN: 40 15588 85006 6

Long sapphire cone
Art.-No.: 85007
EAN: 40 15588 85007 3

Cuticle pusher
Art.-No.: 85008
EAN: 40 15588 85008 0

Cylindrical burr
Art.-No.: 85009
EAN: 40 15588 85009 7

Coarse sapphire disc
Art.-No.: 85010
EAN: 40 15588 85010 3

Rotary flame burr
Art.-No.: 85011
EAN: 40 15588 85011 0

Mandrel
Art.-No.: 85015
EAN: 40 15588 85015 8

**ARTIFICIAL NAIL GRINDING SET
(Mandrel + 30 drum burrs)
FOR MANICURE AND PEDICURE DEVICES
MANILUX L/S AND MP 820**

Art.-No.: 85460
